ARTISTIC SUPERIOR POLE

X-CARBON REINFORCEMENT

• Evoluzione della serie Artistic, ancora più resistente, ancora più affidabile, ancora più bella. Un attrezzo fantastico sia per la pesca in acqua dolce utilizzando fili di generose dimensioni sia per la pesca in mare.
I fusti sono realizzati in carbonio rinforzato con trama a "X". La bolognese monta anelli SiC di altissima qualità e un porta mulinello a placca.

• Evolution of the Artistic series, even more resistant, even more reliable, even more beautiful. A fantastic tool both for freshwater fishing using generously sized lines and for sea fishing. The blanks are made of carbon reinforced with an "X" wrapping.
The Bolognese features very high quality SiC guides and a plate reel seat.

BLANK Ø MM 22

• Waikiki e Ipanema sono le 2 nuove canne al top della serie Fishing Ferrari Signature Hi-Modulus e sono pensate per il pescatore che non accetta compromessi qualitativi di nessun tipo e vuole concentrarsi unicamente sulla sessione di pesca. I fusti sono in carbonio alto modulo extra sottili e potenti in grado di lanciare fino a 280 g (Waikiki) a grandi distanze senza particolari difficoltà. Le canne montano anelli e portamulinelli FUJI di alta qualità trattati anti salsedine. Tutti i modelli sono forniti con fodero imbottito multisezione.

• Waikiki and Ipanema are the 2 new top rods of the Fishing Ferrari Signature Hi-Modulus series and are designed for the angler who does not accept quality compromises of any kind and wants to concentrate solely on the fishing session. The blanks are in extra thin and powerful high modulus carbon capable of casting up to 300 g (Waikiki) at great distances without particular difficulties. The rods feature FUJI guides and reel seats treated against salt. All models are supplied with multi-section padded case.

- CORPO E ROTORE IN CARBONIO
- BOBINA IN ALLUMINIO ALLEGGERITA
- MANOVELLA TORNITA IN METALLO

- CARBON BODY AND ROTOR
- LIGHTENED ALUMINIUM SPOOL
- FULL METAL MACHINED HANDLE

Un gioiello ultraleggero ma estremamente resistente, grazie al corpo ed al rotore in carbonio, oltre che alla bobina di alluminio alleggerita. Adatto per diversi impieghi ed approcci light, dalla trota all'Eging, passando per l'aspio e la spigola. L'estrema scorrevolezza renderà l'azione del recupero facile e confortevole.

An ultralight but extremely resistant jewel, thanks to the carbon body and rotor, as well as the lightened aluminum spool. Suitable for various uses and light approaches, from trout to eging, through asp and sea bass. The extreme smoothness will make the retrieving action easy and comfortable.

REELS

POWERED BY Banax

TRACTOR 305 L-TD

Questo mulinello è stato sviluppato in collaborazione con i tecnici e gli ingegneri Banax, con l'obiettivo di creare un attrezzo indistruttibile e al tempo stesso leggero e maneggevole. I suoi campi di utilizzo spaziano dalla pesca in verticale alla ricerca di super predatori d'acqua dolce, primi tra tutti lucci e siluri, per arrivare a tutte quelle situazioni "hard" in mare, dove la qualità dei materiali e l'affidabilità costituiscono requisiti imprescindibili.

this reel was developed in collaboration with Banax technicians and engineers, with the aim of creating an indestructible and at the same time light and easy to handle tool. Its fields of use range from vertical fishing to the search for super freshwater predators, first of all pike and catfish, to all those HARD situations at sea, where the quality of materials and reliability are essential requirements.

SMASHER MONOSECTION SPINNING MASTER

スピニングロッドマスターシリーズ

Nuova serie di canne monopezzo pensate principalmente per il bass fishing. Questo progetto è stato lungo e difficile. L'obiettivo era quello di seguire la tradizione, e al tempo stesso realizzare una nuova serie condensando gli ultimi ritrovati tecnologici sia in termini di materiali utilizzati, sia di gusto estetico e di azioni specifiche a seconda delle necessità del pescatore.

HUSH

8X

Nuovo braid camouflage a 8 capi, morbido, scorrevole, pensato per tutte quelle tecniche dove sarà fondamentale tenere un approccio "fantasma". La particolare colorazione, infatti, spezza la continuità del trecciato sott'acqua, rendendolo virtualmente invisibile agli occhi del pesce.

New 8 strands camouflage braid, soft, flowing, designed for all those techniques where it will be essential to keep a "ghost" approach. The particular coloring, in fact, breaks the continuity of the braid underwater, making it virtually invisible to the eyes of the fish.

SALTWATER TREATMENT
trattamento anti salsedine

STAR DRAG
frizione a stella

- Sistema guidafilo di ultima generazione
- Scocca in alluminio anodizzato
- Bobina anodizzata in alluminio
- Cuscinetti in acciaio inox sigillati
- Regolatore di velocità
- Settaggio digitale della profondità
- Contametri digitale (mis. in mt)
- Programmazione specifiche filo
- Massima potenza di recupero 88 kg - 160 mt / min (spunto iniziale)
- Funzione anti surriscaldamento / Blocco motore automatico

- Last generation SS line guide system
- Anodized aluminium frame
- Aluminium forged spool
- Premium stainless steel sealed ball bearings
- Speed control clutch
- Digital depth adjuster
- Digital line counter (mt)
- Line pre-setting
- Instant maximum winding power 88 kg - 160 mt / min
- No overheating function / AUTO STOP

- Nuovo albero posto dietro il guidafilo per evitare attorcigliamenti e rotture.
- Doppio albero di contrasto per evitare torsioni e rotture al gruppo guidafilo.
- Limitatore di tensione PTC che interrompe il contatto elettrico evitando di bruciare il display o il motore in caso di surriscaldamento o sovraccarico di corrente.
- Gruppo frizione con aggiunta di disco freno per aumentarne la resistenza e facilitarne la centratura sull'albero.

- New shaft located behind the line guide to avoid tangles and ruptures.
- Double shaft to prevent twistings and ruptures to the line guide.
- PTC voltage limiter which interrupts the electrical contact avoiding to burn the display or the motor in case of power overload.
- Drag cluster with additional disc brake to increase resistance and facilitate the centering on the shaft.

ATTENZIONE:
Le modifiche e/o i tentativi di riparazione del mulinello elettrico in ogni sua parte non effettuate dal nostro centro di riparazione autorizzato fanno decadere ogni tipo di garanzia.

SI CONSIGLIA DI USARE BATTERIE DA 12V CON AMPERAGGIO DA 7A A 12A MASSIMO.
We recommend the use of 12V And From 7 A to 12A Max Batteries.
On recommande l'utilisation de batteries à 12V avec ampérage de 7A à 12A max.
Recomendamos el uso de baterias de 12volt con amperaje de 7 a 12 amperios maximos

LINES

LINEAEFFE 2022

[ITA] Non essendoci attualmente, a nostro avviso, parametri oggettivi utili al pescatore per certificare carichi di rottura e diametri reali dei monofili, Lineaeffe già da anni sta gestendo le indicazioni per i suoi prodotti con il sistema FISH TEST.
Questo test misura piuttosto affidabilmente la robustezza del filo durante l'azione in acqua:
è effettuato con 25/30 m di filo ed è inoltre basato sull'azione della canna, sull'elasticità del monofilo in prova, sulla resistenza della frizione di un mulinello di media qualità e sul contrasto del peso di un pesce vivo in acqua; naturalmente tutti i dati sono indicativi e possono variare in base alle condizioni sul campo.

[ENG] As there are currently, in our view, no objective parameters useful to anglers to certify breaking strength and actual diameters of monofilaments, Lineaeffe is handling these indications since years with the FISH TEST system.
This test measures rather reliably the strength of the monofilament during the action in the water: it consists of verifying the breaking strenght of 25/30 m of monofilament taking into consideration the action of the rod, the action of a medium quality reel and the contrasting strength of an alive fish into the water. All datas are indicative and may vary according to on-field conditions.

[FRA] Comme il n'y a pas, à notre avis, des paramètres objectifs utiles aux pêcheurs pour certifier charges de rupture et diamètres réels des monofilaments, Lineaeffe depuis années gère les indications de ses produits avec le système FISH TEST.
Ce test mesure plutôt fiablement la résistance du fil lors de l'action dans l'eau:
il est réalisé avec un échantillon de fil d'une longueur de 25/30 mètres en fonction de l'action de la canne et du poids d'un poisson vivant en pleine eau, le tout avec un moulinet de qualité moyenne; bien sûr toutes les données sont indicatifs et peuvent varier en raison de conditions de pêche.

[ESP] Dado que actualmente, en nuestra opinión, no estan de parámetros objetivos útiles para el pescador para certificar cargas de rotura y diámetros reales de monofilamentos, Lineaeffe, desde años, administra las indicaciones de sus productos con el sistema de FISH TEST.
Este test mide la fuerza de los hilos durante la acción en el agua y se efectúa verificando la resistencia de aproximadamente 25/30 m del hilo según la acción de la caña, de un carrete de media calidad, y del contraste de la carga de un pez vivo en el agua; por supuesto, todos los datos son indicativos y pueden variar debido a las condiciones del campo.

TAKE® MIMETIC

MIMETIC BLUE MICROPARTICLES / 100 mt.
INVISIBLE IN WATER

INVISIBLE LINE
SPECIAL BOLOGNESE

Le speciali nanoparticelle integrate nel filo simulano perfettamente plancton o altre particelle in sospensione nell'acqua mimetizzando completamente il filo. Gli esclusivi componenti della mescola riducono fortemente l'assorbimento dell'acqua e la formazione di ghiaccio. Take Mimetic affonda rapidamente e taglia l'acqua il 25% più velocemente rispetto ai fili standard.

The special nanoparticles integrated into the line perfectly simulate plankton or particles suspended in water camouflaging the line. The exclusive components of the compound greatly reduce water absorption and ice build-up. Take Mimetic sinks quickly and cuts the water 25% faster than standard monofilaments.

La sua superficie extra liscia permette lanci più lunghi e precisi.
Lo speciale intreccio a 8 capi rende questo filo incredibilmente resistente e durevole. Il profilo rotondo limita fortemente la deformazione in lancio ed elimina quasi totalmente l'effetto memoria.

The super smooth surface allows longer and more accurate casts. Thanks to the 8 strands weave this braid features incredible resistance and durability. The round profile limits deformation while casting and extremely lowers the memory effect.
