DOUBLE-SEALED BALL BEARINGS
Double-sealed, stainless steel ball bearings. Keep grease inside and prevent aggressive saltwater from penetrating.

MICRO-FINE DRAG ADJUSTMENT
A micro-adjustable drag allows an angler to tighten (or losen) the drag in tiny steps. So, it allows him to set the drag more accurately, which makes it possible to play a fish with more finesse.

METAL SPOOL
This symbol means that the reel comes with a metal spool.

INSTANT ANTI-REVERSE® SYSTEM
A special needle bearing stops the rotor from running backwards with perfect accuracy. So you are always in direct contact with the fish which makes very fast and penetrating strikes possible.

FREE SPOOL SYSTEM
Our free spool technique guarantees the fish can take line in a control manner with a closed bail. By turning the handle, the pre-adjusted front drag engages immediately.

FULL ALUMINIUM REEL
Reel body and rotor made from extremely strong and robust aluminium. Aluminium is not only lightweight, it is also rigid, so it won't deform the reel body and/or rotor when under stress, preventing the internal parts from damaging This adds to the durability and reliability of a reel.

ANTI-VIBRO-SYSTEM
Anti-Vibro-System of D.A.M. includes dynamic balancing of flange and crank providing almost vibration-free running for more comfortable fishing and increased durability of the reel.

EFFECTIVE SPEED REGULATION
Instead of an extravagant gear system, our Quick® S-P-S multiplier reels feature a simple but effective power crank handle, adjustable in length. When playing a fish, the angler can effortlessly adjust the handle length. Use the short handle for fast retrieve and the long handle for more fighting power.

GRAPHITE SPARE SPOOL
This symbol means that the reel comes with a graphite spare spool.

WORMSHAFT SYSTEM
Enables extended spool lift, which is a major feature of modern long-range spinning reels. DAMYL® line will be perfectly distributed over the entire spool length, supporting the drag function and allowing longer and more accurate casts.

OVAL OSCILLATION SYSTEM
The patented OOS – Oval Oscillation System is basically logical evolution of our worldwide known S-Stroke System. OOS gives the reel outstanding smooth gearing, an extremely even line lay and a longer life than conventional reels.

METAL SPARE SPOOL
This symbol indicates that the reel comes with an aluminium spare spool.

S-STROKE SYSTEM (PATENT DE 4035846)
The outstanding S-Stroke System of D.A.M. directs the spool lift in a way that criss-cross lay of DAMYL® on the spool is made possible. Thus, even thin or wet braided lines do not cut in and glide off smoothly and perfectly.

ANTI-TWIST SYSTEM
Most of our reels have an Anti-Twist line roller. The concave shaped line roller minimizes the risk of DAMYL® line being kinked when being pulled of the spool.

SEALED BODY CONSTRUCTION
The inside parts, as well as the drag, are fully protected against aggressive saltwater by a unique Sealed Body Construction.

DISTANCE CASTING SPOOL
The ultra wide spool diameter combined with an extra low stroke provides extraordinary and precise distance casting abilities.

ALUMINIUM BODY
Body made of aluminuim. Ideal material for heavy duty reels. Gives a reel maximum stability.

CARBON ROTOR
Carbon reinforced rotor for less weight and increased stiffness and strength. Doesn't bend easily. Handles extreme force better than standard graphite rotors.

LINE DISTANCE CONTROL
The Line Distance Control System allows the angler to cast the same length of line everytime, making sure he´s able to fish permanently exactly on the baited spot or in front of a snag.

QUICK FOLD
Our patented Quick Fold handle system enables you to easily fold out the handle with just a single touch! This way you are able to store multiple rods in one hold-all safely without damaging any guides or DAMYL® line during transport.

CARBON BODY
Carbon reinforced body, to make it lighter, stronger and more durable than a normal graphite body.

MULTI DISC REAR DRAG
Multible drag discs positioned in series transmit the adjusted drag power to the spool. Fine and easy setting of the drag is made possible even when playing the fish.

MULTI DISC FRONT DRAG
A drag system completely integrated in the spool.

STAINLESS STEEL MAIN SHAFT
A stainless steel main shaft makes a reel stronger and more durable. It will perform even under extreme conditions. It resists corrosion even in saltwater conditions.

DS CARBON DRAG SYSTEM
The dragwashers used in this system is a carbon fiber fabric that's laminated on both sides on fiberglass to provide stiffness on the washers which result in a ultra smooth and powerfull drag. The dragwashers can be turned around as well which results in a brand new drag system.

CARBON DRAG SYSTEM
The dragwashers used in this system are made out of carbon fiber. These washers result in a ultra smooth and powerfull drag.

FULL SPOOL MARK
The Full Spool Mark clearly indicates how far the spool should be filled for optimum efficiency. If overspooled there is an increased risk of casting windknots. If underspooled the maximum casting distance potential will not be met.

SALTWATER RESISTANT
The key components in this reel are saltwater resistant These reels can be used under the most tough conditions and keep providing a smooth and strong performance.

CNC GEAR
Computerized Numerical Control Gear means that the gear inside this reel is produced from one solid piece of metal like Stainless Steel, Brass or Aluminium. The end result is a strong more precise gear box inside the reel which last even under the most toughest circumstances.

PRECISION BALL BEARINGS
Ball bearings reduce play and wear on rotating parts to a minimum, resulting in silent and smooth running reels. They also increase durability.

Quick®

The name Quick is iconic in the world of reels, and rightly so. Over the years it has produced reels that have treasured by anglers for their entire lifetimes. The range is as comprehensive now as it has ever been, offering every angler the opportunity to own a Quick reel, no matter how much they have to spend. Even the entry-level price point reels in the Quick range are packed with high-performance features, first-class components, and a quality feel from the moment you pick them up. This year we have added new versions of the Quick 2 and Quick 1, which offer incredible value for money that you simply won’t find with any other reel brand. Start an angler off with Quick and you’ll make an angler for life.

FINESSA 8

Among the stars in the universe of Quick reels, one shines brighter than the rest: the Finessa. This reel represents a concentration of the finest specifications and technology available in the range, with a wide range of sizes from 1000 to 8000 available, to cover every angling eventuality. A discreet but elegant design only further adds to the prestige of this high-end reel.

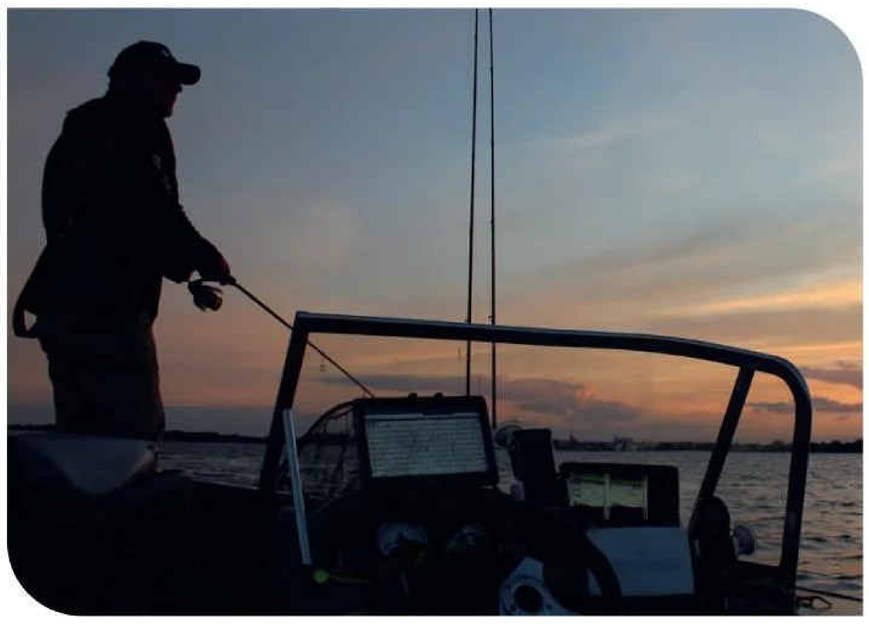

- Graphite body and rotor
- 7+1 stainless steel ball bearings
- Infinite anti-reverse system
- Two-tone openwork Dynamic Design aluminium spool
- Round metal line clip
- Aluminium spare spool
- CNC machine cut aluminium handle
- EVA handle knob
- Oversized aluminium bail
- Machine-cut pinion gear

DARKSIDE 8

If you love the Quick Finessa but you have somewhat of a dark side, then this is the reel for you. Featuring the same concentration of all the same high-spec features as the Finessa, the Darkside is the evil twin of that premium reel featuring an exclusive look. It is available in a wide range of sizes from 1000 to 8000 to cover every angling eventuality. The discreet and dark design further adds to the stealthy attitude of this premium reel.

- Graphite body and rotor
- 7+1 stainless steel ball bearings
- Infinite anti-reverse system
- Two-tone openwork Dynamic Design aluminium spool
- Rounded metal line clip
- Aluminium spare spool
- CNC machine-cut aluminium handle
- EVA handle knob

QUICK 4 FD

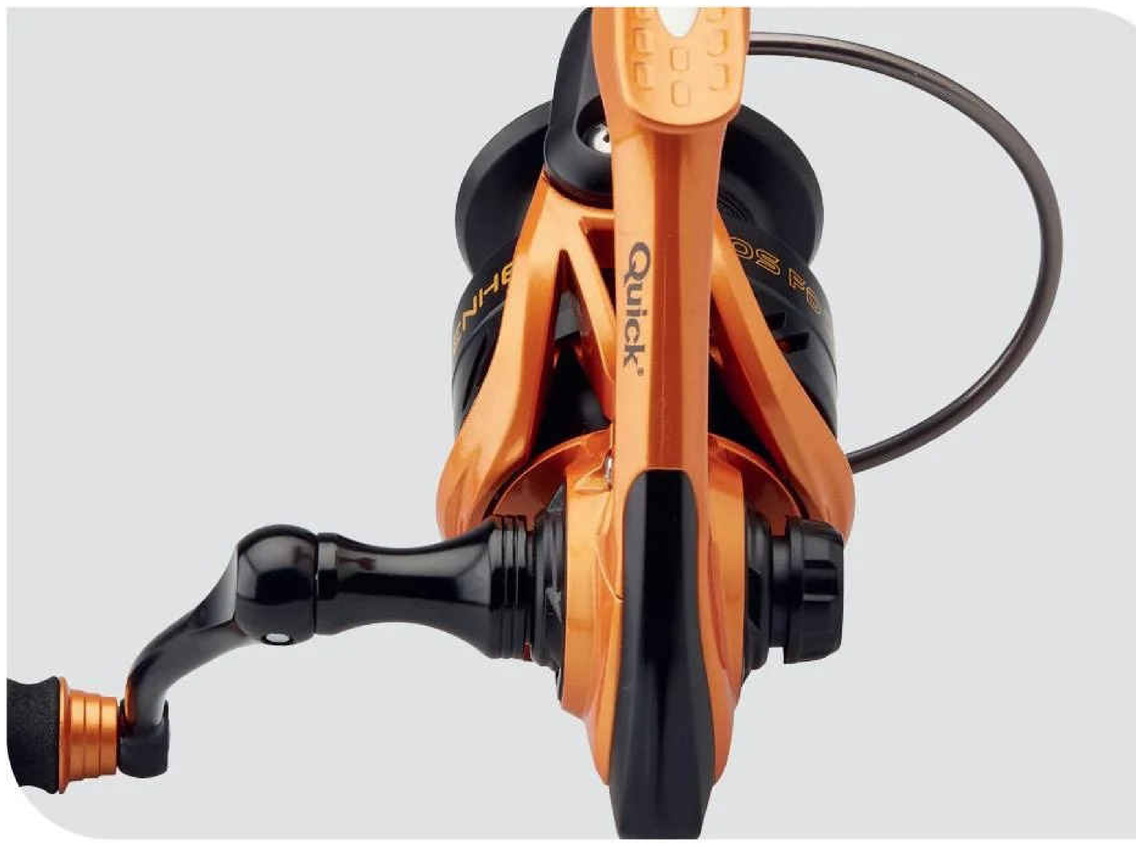

Engineered in Germany with only the best components. This complete range of reels contains small reels for light spinning but also freespool reels and some big sizes which are suitable for catfish and other heavy duty styles of fishing. Strong enough to resist the most fierce fish. Super smooth drag system, strong and reliable gear ready for any adventure at the bank. Available in the sizes 1000- 9000 and a special size 4000 Method Feeder with a shallow spool.

- 6+1 Sealed stainless ball bearings
- Sealed carbon drag system
- EVA handle knob
- Knurled spool
- Lightweight graphite rotor and body
- Anti twist lineroller
- Double anodized spool

FUN-TECH 3 MK1

The key to this reel is in the name: technical and fun. It's the first of the new concept in the Quick reel family that introduces a whole new world of cosmetic style – with each season will come a new look. This year, the MK1 features an eye-catching colour combination that takes style cues from vintage motorcycles. It also benefits from the great technical specs you would expect. These reels will quickly become collector's items.

- Graphite body and rotor
- 2+1 ball bearings
- Infinite anti-reverse system
- Two-tone aluminium spool
- Machine-cut pinion gear
- Oversized aluminium bail
- Graphite handle
- ABS handle knob

SHADOW 5QF

Carp anglers who fish at long distances, your prayers have been answered. The Quick Shadow 5QF SLS reel is specifically designed to make everything about this style of fishing easier and more successful. The 4+1 ball bearings on top of powerful yet smooth 30mm washers in the drag system offer incredible smoothness under heavy pressure. Meanwhile, the built-in slow oscillation gives perfect line lay to help you achieve longer casts with less effort. The reel is built on a strong and lightweight graphite body and also benefits from a machined, gold anodised spool and easy-fold aluminium handle to make it easier to transport or fish on narrow rod pods.

- Graphite body and rotor
- 4+1 sealed ball bearings
- Infinite anti-reverse system
- Slow oscillation worm shaft
- 40mm long-stroke aluminium spool
- Rounded metal line clip
- XL 30mm drag washers
- Fast drag setting
- Large 8000 capacity graphite spare spool
- Stainless steel 7mm thick main shaft
- Oversized aluminium bail
- Machine-cut pinion gear
- Aluminium easy folding handle
- Wooden handle knob

Whether you’re fishing for hungry predators, fast-moving trout or humble coarse fish like tench and chub – DAM has a specialist rod to help you achieve your goal. The DAM rod collection is constantly evolving, and this year is no different with a huge range of new and updated rod ranges brought to the market. Flagship rods like the Nanoflex Pro+ provide amazing casting, sensitivity and power to tame a wide range of species, whereas more niche items like the Adjustable Tele Trout II feature adjustable lengths to help you adapt to the conditions and stay out of sight of the fish you’re trying to catch. DAM rods stand for quality, innovation and reliability – designed to be the perfect tools for the demands of anglers to help maximise their success.

sea·guide® PRECISION ROD COMPONENTS

NANOFLEX PRO PLUS

Our flagship all-rounder spinning rod series for predator fishing just got even better. We took what was great about the three previous generations of the Nanoflex Pro+ and pushed it up another level with this latest version. Featuring an incredibly thin, powerful and lightweight TC30 nano carbon blank, the rod looks as great as it performs with a matt finish carbon cross wrapping and modern, gunsmoke coloured SeaGuide SiC tangle-free guides. There's a reason why we say this rod is the perfect all-rounder predator fishing rod – the nano carbon technology makes it easier to cast long distances with all kinds of lures and gives the blank a delightful moderate-fast action. They say: "if it ain't broke don't fix it", but we think 'they' just didn't try hard enough.

- Slim, light and powerful TC30 nano carbon blanks
- Matt finished carbon-cross-wrapping on the full blank
- Moderate-fast action
- Shiny black down locked VSS reel seat
- SeaGuide SiC tangle-free guides with gunsmoke frame
- Full cork handle
- High-grade black EVA foregrip with rubber cork finish
- Matt 1K carbon design features
- Rubber cork but cap

NANOFLEX PRO PLUS SALMON ACE

The Nanoflex Pro+ Salmon ACE is a two-piece casting rod specially developed for fishing for salmon and large trout. Very popular rod for, among other things, spin fly fishing. Built with the latest Nanoflex concept and technology, allowing to maximize durability while keeping the rod very light and perfectly balanced. Equipped with quality SeaGuide guides, full cork rear handle and EVA front handle for secure grip.

CULT-X SPIN

The Cult-X series is a very complete series with incredibly good value for money. By using slim and lightweight 30TC carbon blanks these rods feel incredibly well balanced. The fast action makes these rods perfectly suitable for lure fishing for perch, pike and Zander. The wide range also includes very light casting weights which are great for all lighter fishing disciplines like trout fishing or drop shot fishing. The series also includes a variety of casting models covering all techniques from vertical jigging up to heavy jerk baiting or big soft lures. The Cult-X rods have a very good looking cross woven blank finish and a fresh and recognizable white window which holds all the important information as well as the cool Cult-X logo.

- Sensitive and lightweight 30TC carbon blanks
- Modern K-frame guides + Micro guides
- Hi-grade cork and EVA handle
- Cross-carbon blank on the butt section
- Fast action

YAGI

YAGI SPINNING ROD

The DAM Yagi is the next generation of our extremely popular EFFZETT Yagi rods. For the new DAM Yagi we took a close look on the key components like blanks and guides. All blanks have been reworked to improve the already fast action and the sensitivity of these rods. One of the most significant changes are the much lighter K-guides that will come with all models. We kept the well-established color scheme as it is. Light grey and dark grey have been added for the new DAM Yagi Light Jig and Ultra Light Jig models.
All together the new DAM Yagi series offers a much better product in all points, be it design, action or the assortment itself.

- IM8 high modulus carbon blanks
- K-frame guides + Micro guides
- Laser engraved butt cap
- High grade EVA two-piece handle
- Fast action

YAGI LIGHT SPOON

CARBON SOLID TIP

The DAM Yagi Light Spoon rods are specially designed for fishing with light spoons but can also handle other small lures like small soft lures. The incredibly sensitive carbon solid tips detect even the slightest bites and due to the semi-parabolic bending curve, these rods offer incredible safety while playing the fish and great fun even with smaller fish. Yagi Light Spoon rods are built with the same blank technology that is used for all our extremely popular Yagi rods. Equipped with low leg K-frame guides and a down-screw reel seat.

- IM8 high-modulus carbon blanks
- Carbon solid tip
- K-frame guides + Micro guides
- Butt cap with laser engraved DAM logo
- High grade split EVA handle
- Moderate action

SHADOW TELE SPINNING ROD

The DAM SHADOW Tele rods convince not only with their very thin, light and fast 24TC carbon blank and the use of high-quality components, but also with their modern and timeless design. The Shadow Tele rods are equipped with light but resistant wrapped guides, which means that the action is much faster than with conventional telescopic rod rings. The rods are very good and balanced in the hand and the interaction of the camo-EVA fore grip with the classic cork handle makes the rods a real eye-catcher. The semi-parabolic action cushions head butts and quick escapes but still offers enough power reserves to land even capital fish safely.

- Slim, light and powerful 24TC carbon blanks
- Moderate-fast action
- Black anodized metal parts
- Light-weight single-leg wrapped guides
- High grade full cork handle
- Camo-EVA fore grip

SHADOW TELE MINI SPINNING ROD

The name Shadow Tele Mini Spin is based on the characteristic feature that has made these fishing rods unique and extremely popular for many years. This feature is the incredible short transport length, which makes them perfectly suitable as travel rods or if fishing is not priority one on a day hiking in nature. With the Shadow Tele Mini Spin in the backpack there is no chance of missing out on making a few casts on a new and interesting fishing spot. The latest generation comes with wrapped guides instead of the old fashioned and heavy standard tube guides. This updated guide setup reduces the weight on the blank and due to that the already fast and responsive action feels even better. The timeless design and the use of quality components makes these rods a pleasure to fish.

- Slim, light and powerful 24TC carbon blanks
- Moderate-fast action
- Black anodized metal parts
- Light-weight single-leg wrapped guides
- High grade full cork handle

ADJUSTA TELE TROUT II

Everything you loved about the original Adjusta Tele Trout rods has just been made even better thanks to the introduction of even lighter and slimmer blanks, an eye-catching new design and better quality finishing and components. The really special feature of these rods is the ability to adjust the length according to the river that you are fishing in. Small creeks with shallow water require stealth and subtlety, that's when the angler should use the full length of the rod to stay as far away from the water as possible. On bigger rivers with deeper water where stealth isn't as important, the angler can use the rod in its minimum length for more comfortable fishing. The Adjusta Tele Trout rods are equipped with a very sensitive tip to detect even the gentlest of bites, but at the same time, their backbone is strong enough to fight the trout of a lifetime.

- High-quality TC24 carbon blank
- Quality guides and Adjusta rubber inserts
- Black stainless steel metal reel seat
- Easy-to-clean, rubber-coated handle ensures perfect grip

PTS II DISTANCE

These lightweight yet powerful carbon rods intended for distance fishing have proved so popular that we have added three new models to the range, covering casting weights from 5 to 25g. Particularly useful for fishing with bombardas, these rods give you real punch when looking to cast to the horizon.

- Bespoke guide set-ups according to casting weight
- 5-25g models: double-legged starting guide, single-legged guides to tip
- 10-50g models: double-legged guides along the whole rod

XT1 2 SECTIONS SPECIMEN ROD

Although it might sound like a familiar marketing cliché, there really is something out of the ordinary about the XT1 rods, that simply makes them stand out. What makes the XT1 rods so convincing is simply how much rod you get for your money. Like the previous generation, also the latest XT1 rods are built with the same slim, lightweight and extremely powerful 24TC carbon blank that handles casting to enormous distances with ease. The updated XT1 rods are equipped with local Minima guides, which are not only much lighter than the old guides, but also offer a better performance and look.
A great side effect is that the decreased weight of the guides is directly resulting in an improved casting performance!
We dare say that there is a rod for everybody, because the range covers pretty much every need, from short and light until long and heavy, many with a size 50 starting guide. To round this anyway complete series of, there are 2 great telescopic models and beast of a Spod & Marker rod.

- Slim, lightweight and powerful TC24 carbon blanks
- Fast action
- Light, durable and modern local Minima guides with black frames
- High grade EVA foregrip and sanded non-slip rear grip for power casting
- DPS reel seat with black hoods
- Cross woven window pattern
- Black anodized aluminium butt cap

ICONIC CARP

The most amazing thing about the DAM Iconic Carp rod range is just how much rod you get for your money. By utilising the latest carbon fibre technologies, we have created a series of rods packed with power and durability, yet still lightweight and slim thanks to the TC24 carbon blanks – all for a price you simply wouldn't expect for this high standard. The series offers a wide selection of two-piece and three-piece rods, designed and built with high-quality specs such as SIC guides and DPS reel seats. Ranging from relatively short 8ft rods with a light test curve ideal for smaller waters or stalking, through to the long 13ft rods with heavy test curves and size 50 starting guides purpose made for distance casting over 100m – the Iconic Carp range truly has a rod for everybody.

- Slim, lightweight, and powerful TC24 carbon blanks
- Fast action
- Durable and modern SIC guides with black frames
- Sanded non-slip rear grip for power casting
- DPS reel seat with black hoods
- Black anodised aluminium butt cap

DETEK DTK EXTREME CARP POLE

We've taken the hassle out of catching carp on the pole with our strong and reliable Detek Extreme carp pole kit. Made with high quality 40TC+30TC carbon that is as lightweight as it is strong, this kit includes two top kits and an extension section that can increase the overall length of the pole by 65cm. The first top kit has two sections and features a carbon reinforced section that allows you to drill a small hole into the blank to create your own pulla system. You can also fish elastic through the tip. The second top kit is also two-piece already set-up for a pulla system and feature PTFE brushing. With the Detek Extreme Carp Pole Kit you are practically ready to start catching carp straight out of the box – just attach a pole rig, and you are ready to go. It couldn't be easier.

- Lightweight, slim and powerful 40TC+30TC carbon construction
- Includes 2 2-section top kits
- Extension section to extend by 65cm
- High-quality finishings
- Supplied with convenient carry bag

DETEK PICKER

The DAM DETEK Picker has an extremely lightweight and semi-parabolic 24+30TC carbon fiber blank and is equipped with premium components, such as the incredibly minimalistic but strong and lightweight SeaGuide guides. The blank fully loads up already with lightweight feeders and easily catapults the rig to long distances. The 3 carbon quiver tips reliably indicate also softest bites and absorbs head shakes and fast movements of the hooked fish perfectly. The strong backbone offers enough power reserves to also stay in constant control of larger specimen.

- Extremely slim, lightweight but powerful 24+30TC carbon blanks
- Matt blank finishing
- High quality SeaGuide guides
- Downscrew DPS style réel seat
- 3 carbon quiver tips
- D-shaped hook keeper
- Premium AA cork handle with EVA fore and rear grip

Sales Unit 1

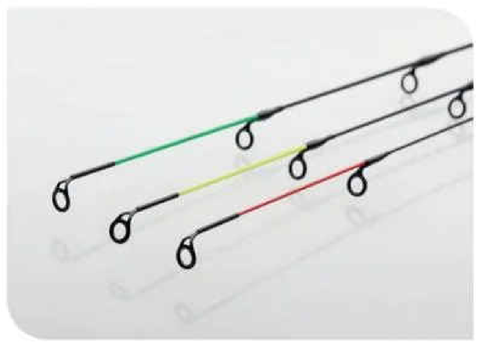

DETEK METHOD FEEDER

The parabolic action of the DAM DETEK Method Feeder rods makes them ideal for method feeder fishing. The rather soft action allows soulful casts to both short and long distances without losing the feed from the method feeder. Furthermore, the parabolic action ensures less hook pulls during the fight and optimally cushions sudden and violent bites. During the cast, the fast 24 + 30TC carbon blank recovers quickly and returns to its starting position, what makes it easier to make accurate casts repeatedly.

- Extremely slim, lightweight but powerful 24+30TC carbon blanks
- Matt blank finishing
- High quality SeaGuide guides
- Downscrew DPS style réel seat
- 3 carbon quiver tips
- D-shaped hook keeper
- Premium AA cork handle with EVA fore and rear grip

DETEK LIGHT FEEDER

The DAM DETEK Feeder rods are developed for feeder fishing for almost all coarse fish such as bream, tench, barbel and carp. The powerful 24 + 30TC carbon rod blanks paired with a very fast action gives these rods enough power reserves and great casting properties which make it easy to reach long casting distances. The DETEK rod series should have the right rod for every purpose, from light casting weights for fishing in small ponds or streams, to the XX-Heavy Feeder, which is, with a length of up to 4.20m and casting weights of up to 240g, ideal to fish with heavy feeder cages on big rivers or other large bodies of water.

DETEK MATCH

The DAM DETEK Match rods convince with a very thin blank diameter, light weight and the use of high-quality components such as SeaGuide guides. The rods have a great balance and the fast 24 + 30TC carbon blank makes it easy to reach excellent casting distances even with the lightest rigs. During the fight, the parabolic action cushions head shakes and quick runs safely what enables the use of thin leaders and main lines without the risk of losing a fish due to line breakage.

IMAX TRAVEL BOAT

Why compromise on quality with a travel rod? After all, the fish you are trying to catch on your trip won't be giving you an easy ride just because you're using a travel rod. With that in mind, we have revamped our travel boat rod giving it a new camo design EVA handle and bolstering its power with a TC24 carbon blank. It also includes high-quality saltwater resistant components, so you know you can rely on it, even in harsh conditions.

- TC24 carbon blank
- Five-piece construction
- High-quality saltwater resistant guides
- High-quality two-piece aluminium DPS reel seat
- High-quality camo EVA handle
- Supplied in a cloth bag

Sales Unit 1

IMAX SHAD & PILK

Specially designed for fishing big, heavy soft lures in places like Norway, the North Sea and the Baltic Sea, the IMAX Shad and Pilk rods offer heavy-duty performance with no compromises. The slim and lightweight blank is packed with hidden power reserves to help you pump even the largest cod to the surface, while the unique tip action helps buffer head shakes from fish to vastly reduce the risk of losing them. The high-quality, saltwater resistant guides feature a special frame shape that all but eliminates tangles, leaving you free to concentrate on the battle at hand. These rods are also perfect for shallow water halibut fishing.

- TC24 carbon blank
- High-quality, saltwater resistant, tangle-free guides
- High-quality DPS reel seat
- High-quality camo EVA handle
- Rubberised reel seat
- Supplied in a cloth bag

BACKBONE II STELLFISCH

The Backbone II Stellfisch rods are long and powerful 24TC carbon telescopic rods that are traditionally used to fish for pike with a bait fish. The long length helps the angler to constantly present the baitfish in otherwise hard-to-reach spots, like the other end of a sunken tree or at the edge of the current.

- Strong and powerful 24TC carbon blanks
- Handle section with 1K carbon pattern
- Easy to clean, non-slip sanded handle
- Quality reel seat
- Strong and durable guides
- Supplied in a cloth bag

SPEZI STICK II CARP TELE

The DAM Spezi Stick II rods are the latest generation of one of the most popular and successful DAM rod series of all time. The DAM Spezi Stick II rods are built with a totally new carbon blank, with a much better action, smaller diameter and lower weight as well as with more modern and slim guides. The fresh and modern design with the exclusive looking cross-carbon blank surface make the Spezi Stick II series a strong successor. Even after all the improvements we made, the Spezi Stick II rods are available for a very attractive price and cover every fishing technique in freshwater. To make the identification of the various rods clearly and to facilitate the assignment, the respective target fish is printed directly on the rod blank.

BASE-X TELE STELLFISCH

The Base-X Tele Stellfisch rods are long and powerful telescopic rods that are traditionally used to fish for pike with a bait fish. The long length helps the angler to constantly present the baitfish in otherwise hard-to-reach spots, like the other end of a sunken tree or at the edge of the current.

- Powerful fibreglass blanks
- Quality DPS style reel seat
- Durable EVA handles
- Quality guides
- Supplied in a cloth bag

BASE-X BOLO

The Base-X Bolo rods are telescopic rods for light float fishing with a great value for money. The light but powerful fibreglass blank gives the Base-X Bolo enough backbone to easily take on carp and other powerful fish. However, the tip is sensitive enough to use thinner leaders without having to worry about line breakage.

- Powerful fibreglass blank
- Quality DPS style reel seat
- Non-slip handle
- Quality guides
- Supplied in a cloth bag

FORRESTERFLY II COMBO

Since fly fishing is getting more and more popular, many people get inspired and interested in trying fly fishing for themselves. But a lot of beginners give up before they even started, because they don't know what they need, and they see that it seems to be very difficult to buy the right products and expensive at the same time. To eliminate both problems is exactly why the DAM Forrester Fly II Allround Fly Fishing Set is created. Everything that is needed to start the art of fly fishing is included in this set. Next to the good quality carbon fly rod with an aluminum reel seat there is an ABS graphite fly reel, which is already spooled with backing and fly line and a fly leader. Together with the flies in the small fly box that is also included, there is everything that is needed to start fly fishing for a very reasonable price.

- Four-piece carbon fly rod 2,70 m #5/6
- ABS-graphite fly reel #5/6
- Forrester Fly Backing 25lb/ 60m
- Forrester Fly Line WF5F (weight forward, floating)
- Forrester Fly Leader
- Fly box including flies

FUN-TECH MK1 SPIN

The key to this combo is in the name: technical and fun. It's the first of the new concept in D.A.M. combos that introduces a whole new world of cosmetic style – with each season will come a new look. This year, the MK1 features an eye-catching colour combination that takes style cues from vintage motorcycles. It also benefits from the great technical specs you would expect. These combos will quickly become collector's items.

DAM

DETEK

DETEK FLEX FEEDER SWIVEL

The perfect feeder cage to fish unnoticed even in clear waters. The camouflage design of the cage makes it practically invisible under water. Through the many openings, the water can quickly penetrate the cage so that the bait is quickly pressed out of the cage. The built-in swivel helps to avoid tangles.

SAP NO.	DESCRIPTION	PRICE
SVS66010	DETEK FLEX FEEDER SWIVEL 50G L 24PCS	

Sales Unit 1

DETEK METHOD FEEDER INLINE

The ribs of the DAM DETEK Inline Method Feeder are ideally suited to safely transport both method groundbait and soaked pellets to the fishing spot. Once at the bottom of the water, the DETEK Inline Method Feeder quickly releases its load, the fish can quickly find and suck in the groundbait and, of course, the hook bait. In connection with our Method Feeder Mold in the appropriate size, weights of the same size are always achieved, which enables precise casting. The aerodynamic design makes accurate throwing easier. Instead of the swivel, our DAM DETEK Quick Change Bead can also be used.

HAMMERHEAD LANDING NET

Our „Bärenstark“ or Hammerhead landing nets are most probably the sturdiest and most durable landing net in the world since years! Now the best has become better with a new three point connection in the landing net handle. These high quality landing nets have a cast aluminium link which secures the net frame to the pole. The sturdy folding mechanism can be operated with just one hand. At the touch of a button, it can be opened and folded down again to save space. Available in a two and three section telescopic handle and manufactured of bend resistant aluminium and can be smoothly locked in position with a twisting action. The rubberised nylon net is stretched open with strong perlon wire ready for the catch. The rubberised net has several advantages: The hook can easily be removed, it sinks quickly in the water, it don´t get tangled and it can easily be cleaned with no remaining smells.

- Easy-to-handle, foldable ultra strong aluminium head
- Rubber coated mesh
- Secure handle locking system to change the handle length
- Very strong and weight optimized handle
- Compact transportation size

CROSSPOWER LANDING NET

This compact telescopic landing net series has lots to offer for today’s active angler. The versatile nets are durable, compact to transport, easy to handle and feature mesh with a rubber coating. Thanks to this rubber coating, the net is unable to absorb water and thus can be stowed away directly after fishing without getting stinky. It is also makes the net lighter when it is used frequently during the fishing day. Another advantage is that the hook will not get tangled in the mesh as easy as with commonly used nets. This series is the perfect partner for mobile predator anglers! Available in a two and three section telescopic handle and in five different sizes.

- Easy-to-handle, foldable nylon-graphite head
- Rubber coated mesh
- Secure Cam-Lock handle locking system to change
- the handle length
- Very strong and weight optimized handle
- Compact transportation size

BASE-X LANDING NET

As an angler you can rely on the Base-X landing net series from DAM at all times to be able to securely land the fish whenever you want to. The DAM Base-X telescopic landing net series consists of extremely reliable nets that are made of durable high grade materials and designed for quick and easy handling. Next to the improved locking system on the telescopic handle part, the nets feature the revolutionary quick-dry mesh. Available in two-piece telescopic handles, in the most common lengths and head sizes. So there is a DAM Base-X net for everyone.

ALU-HEAD LANDING NET SET

A complete series of high quality landingnets made by fishermen for fishermen. Equipped with a very stable black aluminium profile tube, a modern design that meets the latest standard for the demanding angler. High quality mesh, a very strong head made of highly resistant aluminium, strong metal head frame, easy working and safely closing handle screws and a sure-grip rubber handle cap. A great feature is the rubber (100% soft polyester) coating on the mesh. These nets come in an economic bulk carton containing fifteen pieces of the most sold and popular lengths!

- Content, 15 pieces in a master carton:
- 5 Pieces, 2 piece telescopic handle 170CM length with a 50x50x40CM rubberized net
- 5 Pieces, 2 piece telescopic handle 200CM length with a 50x50x40CM rubberized net
- 5 Pieces, 2 piece telescopic handle 240CM length with a 60x60x50CM rubberized net

BIG FISH NET FOLDABLE

The DAM Foldable Big Fish Net is a very practical allround landing net where also the biggest fish will fit in easily. The problem of fitting the net in the car or having problem while carrying big nets to the spot have an end now. This is because the frame is foldable and can be reduced in sice by 50% with this function. The handle can also be moved up once the net head lock is unlocked. This is helping to reduce the size even more. The net material is fast drying and with a hole diameter of 10mm the net can be moved easily through the water.

DAM

FLOATING LANDING NET XL

The DAM Floating Landing Nets have been proven to be very successful and with the XL version this range is complete. The long handle (110CM) makes it easier to land the fish while fishing in a Belly Boat or when the angler just need a couple of extra centimeters to land the fish of a lifetime. It is also a great help for unhooking fish because the net can never get lost. The rubber mesh solves the problem of hooks getting stuck in the net, dries quickly and is practically resistant to any smell. The fabric around the frame minimizes the chance of losing a fish during netting because the hook gets stuck in the mesh.

EXTREME NYLON NET

The DAM Extreme Nylon Net, the name already explains it. A heavy duty net with an aluminium handle and frame where also the biggest fish will fit in easily. The special mesh is made of a special nylon cord which is very durable, has a big mesh and doesn't tangle with hooks. The handle can be moved up once the net head lock is unlocked. This is helping to reduce the size during transport. The special net material is fast drying and with a mesh diameter of 40mm(!) the net can be moved easily through the water.

FLOATING SQUARE LANDING NET

The DAM Floating Landing Nets are floating with the full frame on the surface. This is a great help for unhooking fish because the net can never get lost. The rubber mesh solves the problem of hooks getting stuck in the net, dries quickly and is practically resistant to any smell. The fabric around the frame minimizes the chance of losing a fish during netting because the hook gets stuck in the mesh. The 3 available shapes cover all fishing styles from fly fishing, to seatrout fishing or spinning for predators.

QUICK RELEASE CONNECTOR

It's not often that such a simple but effective product can make fishing so much more comfortable. The angler hangs his fly net in one of the clips and the other clip goes into the eye on the back of his fly vest. When he needs the net, all he has to do is pull on it and he's ready for action. The elastic is just to make sure that the can't lose the net (for instance if he has to walk through bushes or if he is standing in deep, running water).

XT1 CARP CARRYALL ASSORTMENT

No matter how your customers prefer to fish, you can offer them an organization solution to match their needs with this value-for-money bundle of high-quality luggage. Comprising no less than 15 individual bags in three different sizes, there is something to suit every taste. Each bag features four outer pockets and one main compartment, which benefits from a new U-shaped zipper for easier loading and unloading. This season, the bags are designed in a stylish olive green colour, making them even more appealing to a wide range of anglers. Besides plenty of storage space, the bags are also made from a durable, long-lasting fabric.
If you are a high-volume seller, this luggage bundle is perfect to help your customers keep their fishing tackle organized.

- 15 single bags in three different sizes
- Four outer pockets and one main compartment for endless storage possibilities
- Made from high-quality fabric (100% polyester)
- Each bag comes packed in a polybag with a barcode sticker
- Carry-all M (40x23x25cm)
- Carry-all L (50x28x30cm)
- Carry-all XL (60x33x35cm)

INTENZE TACKLE BAG

Featuring a fresh and modern design these tackle bags offer several useful compartments as well as a number of integrated hard PVC boxes for any kind of lures and terminal tackle. While the small and medium one has mainly been developed for the active spin angler walking along his fishing water, the large bag is mainly thought for the boat angler who carries a lot more of equipment!

IMAX OCEANIC DAY QUIVER

The IMAX Oceanic day quiver is the little brother of the competition quiver, designed for the angler who still requires plenty of kit, but not quite the same levels as the competition angler. The quiver can hold up to four rods within its padded interior and has plenty of pockets and straps on the outside for shelters or tripods. The quiver also features a new, fully adjustable shoulder strap and dual carry handles, which means it will always be balanced and easy to carry, no matter how fully loaded it is.

- Fully padded quiver carries up to four rods internally
- Fully adjustable shoulder strap and carry handle
- Two adjustable retaining straps
- Three-quarter length zips for easy loading
- Toughened, waterproof base for durability
- Made of 100% easy-to-clean 600D coated polyester
- Oversized, saltwater resistant nylon zippers

Sales Unit 1

IMAX OCEANIC ROD HOLDALL

The IMAX Oceanic rod holdall is a full-length padded rod holdall offering secure protection for two rods. Due to its Hex Lock system, it is freely adjustable so two-section rods from 11’ up to 14’8” are fully protected within its padded shell. Tripods and shelters can be easily be accommodated on the outside of the holdall. It also features a fully adjustable shoulder strap and dual carry handles, so the holdall retains its balance when being carried.

- Carries and fully protects two rods
- Fully adjustable padded shoulder strap and dual carry handles
- Zipper for easy loading
- Hex Lock system for full adjustment
- Toughened, waterproof base for durability
- Made of 100% easy-to-clean 600D coated polyester

IMAX COMPETITION BEACH SHELTER

The Ultimate beach shelter giving full weather protection for upto 2 people due to its unique design which can be adjusted to suit the angler. Set up from the floor up means that it can be erected in strong winds without fear of it blowing away. Folding down into a neat compact bag allows for it to be transported easily in a boot of a car and on the beach with built in carry handles. The rigid frame work is self-supporting without pegs but it has several pegging points and a sand skirt which can be used in the worst weather conditions for security. Once erected the shelter can be spread out to accommodate another angler and with its angled frames means that more of the shelter is usable for storage of equipment. Each side externally has rod holders for spare rods or when baiting up.

- Super light-weight beach shelter
- Set up from the floor up
- Pegging points and sand skirt
- External rod holders
- Accommodates 2 anglers and kit
- Packs down small for transport and storage
- Comes in storage bag with handles

CAMOVISION BELLY BOAT WITH AIR PUMP

The DAM CamoVision Belly Boat does not only look extremely cool, it also offers a lot of safety and space for the angler. The boat has 2 separate air chambers as well as the seat and back-rest which have a high buoyancy as well. Even if a hook would get stuck in one of the chambers, the other air chamber and the seat will have enough buoyancy to support the angler to get back to the bank safely. The CamoVision Belly Boat is equipped with 2 side pockets which are attached to the boat on a not disturbing and easy to reach position what gives the angler plenty of space for fishing.
Outer fabric made from high quality 600D CamoVision polyester, inner tubes made from 100% PVC.

- Strong 600D CamoVision material (100% polyester)
- 2 inflatable air chambers (100% PVC)
- 2 side pockets, attached
- Comfortable seat and back-rest
- 2 thick padded shoulder straps for longer transport
- Carry handle at the bow

INTENZE -20 THERMAL SUIT

When the cold bites, make sure you can stay for when the fish bite too, with the DAM Intenze thermal suit. Designed with superior warmth in mind, this waterproof and breathable two-piece features thick 200gsm insulation to keep your body temperature up when the outside temperature tumbles. As well as keeping you warm and dry, this suit is made to be comfortable with adjustable elastic straps on the braces, detachable and adjustable hood, and adjustable cuffs. All of this at a price that you wouldn't expect for such an effective suit.

- Waterproof (8.000mm) and breathable (800mvp) TPU membrane 100% polyester fabric with DWR finish
- 200gsm insulation for great warmth
- Detachable and adjustable hood
- Three zippered pockets
- Bib and brace has adjustable elastic straps for good fit
- Large two-way front zipper
- Long zippers in legs and Velcro closure

EFFZETT®

There probably isn’t a fishing tackle box out there that hasn’t had an Effzett spinner inside it at some point during its life. This classic, million-selling lure design is still performing as well for anglers today as it did when it was first introduced all the way back in 1933. The perfect shape and design of the blades have been proven to catch fish all around the world. While we still make those classic spinners, which have since had some smart modern tweaks applied to them, we also provide a wide range of spoons that can tempt even the wariest of predator fish to take a bite. Effzett spinners and spoons get tied onto a line on a regular basis by all kinds of anglers – they’re just so effective.

FLUO SPINNER

These spinners belong in every tackle box, especially in low light conditions or in murky waters. Switching to one of these fluoro colours can be the difference between a wet or dry net.

SINGLEHOOK SPINNER

More and more trout waters are now adopting a single hook rule. Therefore we also offer seven successful spinners in three sizes each with single hook.

NATURE 3D SPINNER

The Nature 3D series we allows the angler to target specific predatory species. They present an extremely realistic imitation of all common types of bait fish, with the complex 3D decoration on the blades making these spinners appear much more life-like underwater.

TANDEM SPINNER

Our popular EFFZETT® Tandem Spinner features a clever connection design, meaning you actually have three spinners in one! Fishing them as a complete tandem is one of the most effective methods for pike, but you also have the option of removing the lower big spinner to use the smaller one as a perch or trout lure. Or simply use the large spinner on its own for zander.

GOLD SILVER COPPER GUNSMOKE

FAST WATER SPINNER

The EFFZETT® Fast Water Spinners are specially designed for fishing in fast running water. The heavy body in combination with the slightly longer blade gives these spinners an extremely stable action in heavy current and allows the angler to fish deeper than with a normal spinner.

TWIN SPOON

With four-fold catching attraction this ingenious development has produced sensational results across the world. In test angling the results were more than convincing.

- The secret of such success is based on
- the ingenious fourfold attraction:
- The additional vibrations in the water caused
- by the jet-like effect of the double blades
- The acoustic attraction from the continuous contact
- between the two fluttering spinner blades
- The original EFFZETT® Spoon blade,
- well proven with over one-million sales!
- The extremely effective surface decoration
- of the original EFFZETT®

SLIM STANDARD SPOON

When distance counts and the water is fast flowing, the EFFZETT® Slim Spoon is the perfect choice. Its aerodynamic shape makes it ideal for long-range casting. With gentle, meandering movements it entices sea Trout and salmon just as effectively as it attracts zander and pike.

SIZE GUIDE

BODY MEASUREMENT TABLE TO FIND THE CORRET SIZE (CM)

Below you'll find a size guide. This table lets you use your own body measurements to choose your size. The easiest way to measure your body measurements is with a measuring tape. To find the size that fits you best, compare your body measurements with the sizes shown in the table.

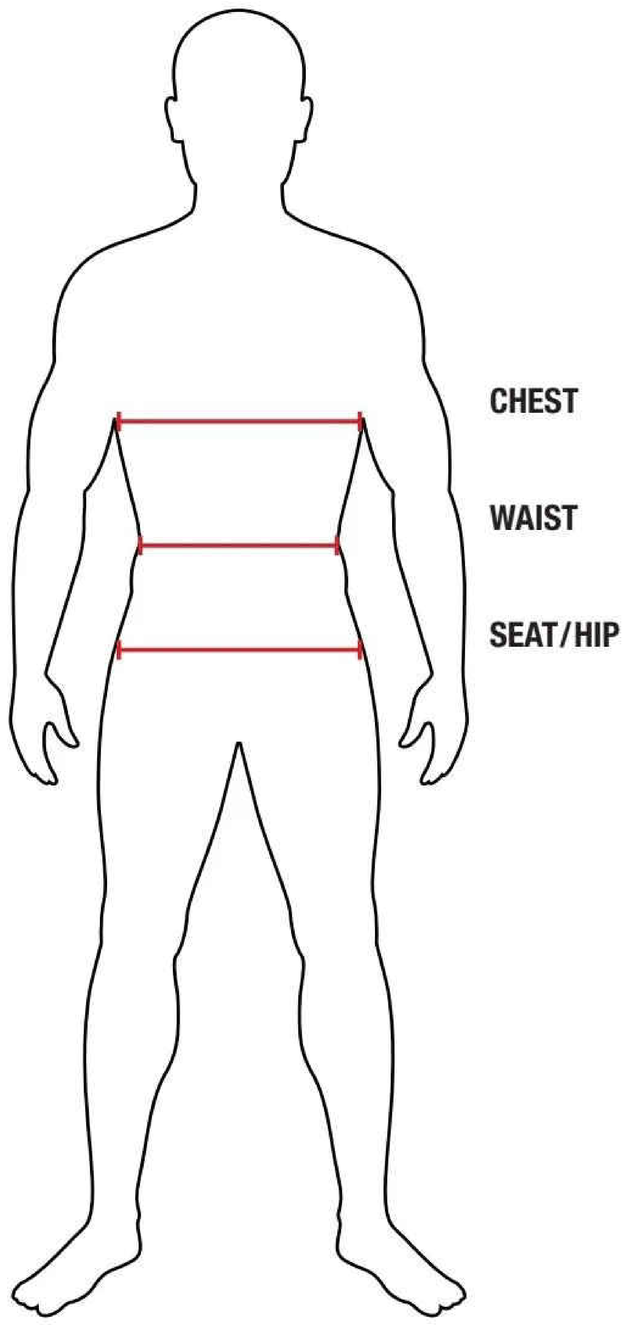

BODY MEASUREMENTS - MEN

SIZE	S	M	L (52)	XL	XXL	3XL
CHEST 1/2	47 CM	50 CM	53 CM	56 CM	59 CM	62 CM
WAIST 1/2	40.5 CM	43.5 CM	46.5 CM	49.5 CM	52.5 CM	55.5 CM
SEAT/HIP 1/2	48 CM	51 CM	54 CM	57 CM	60 CM	63 CM

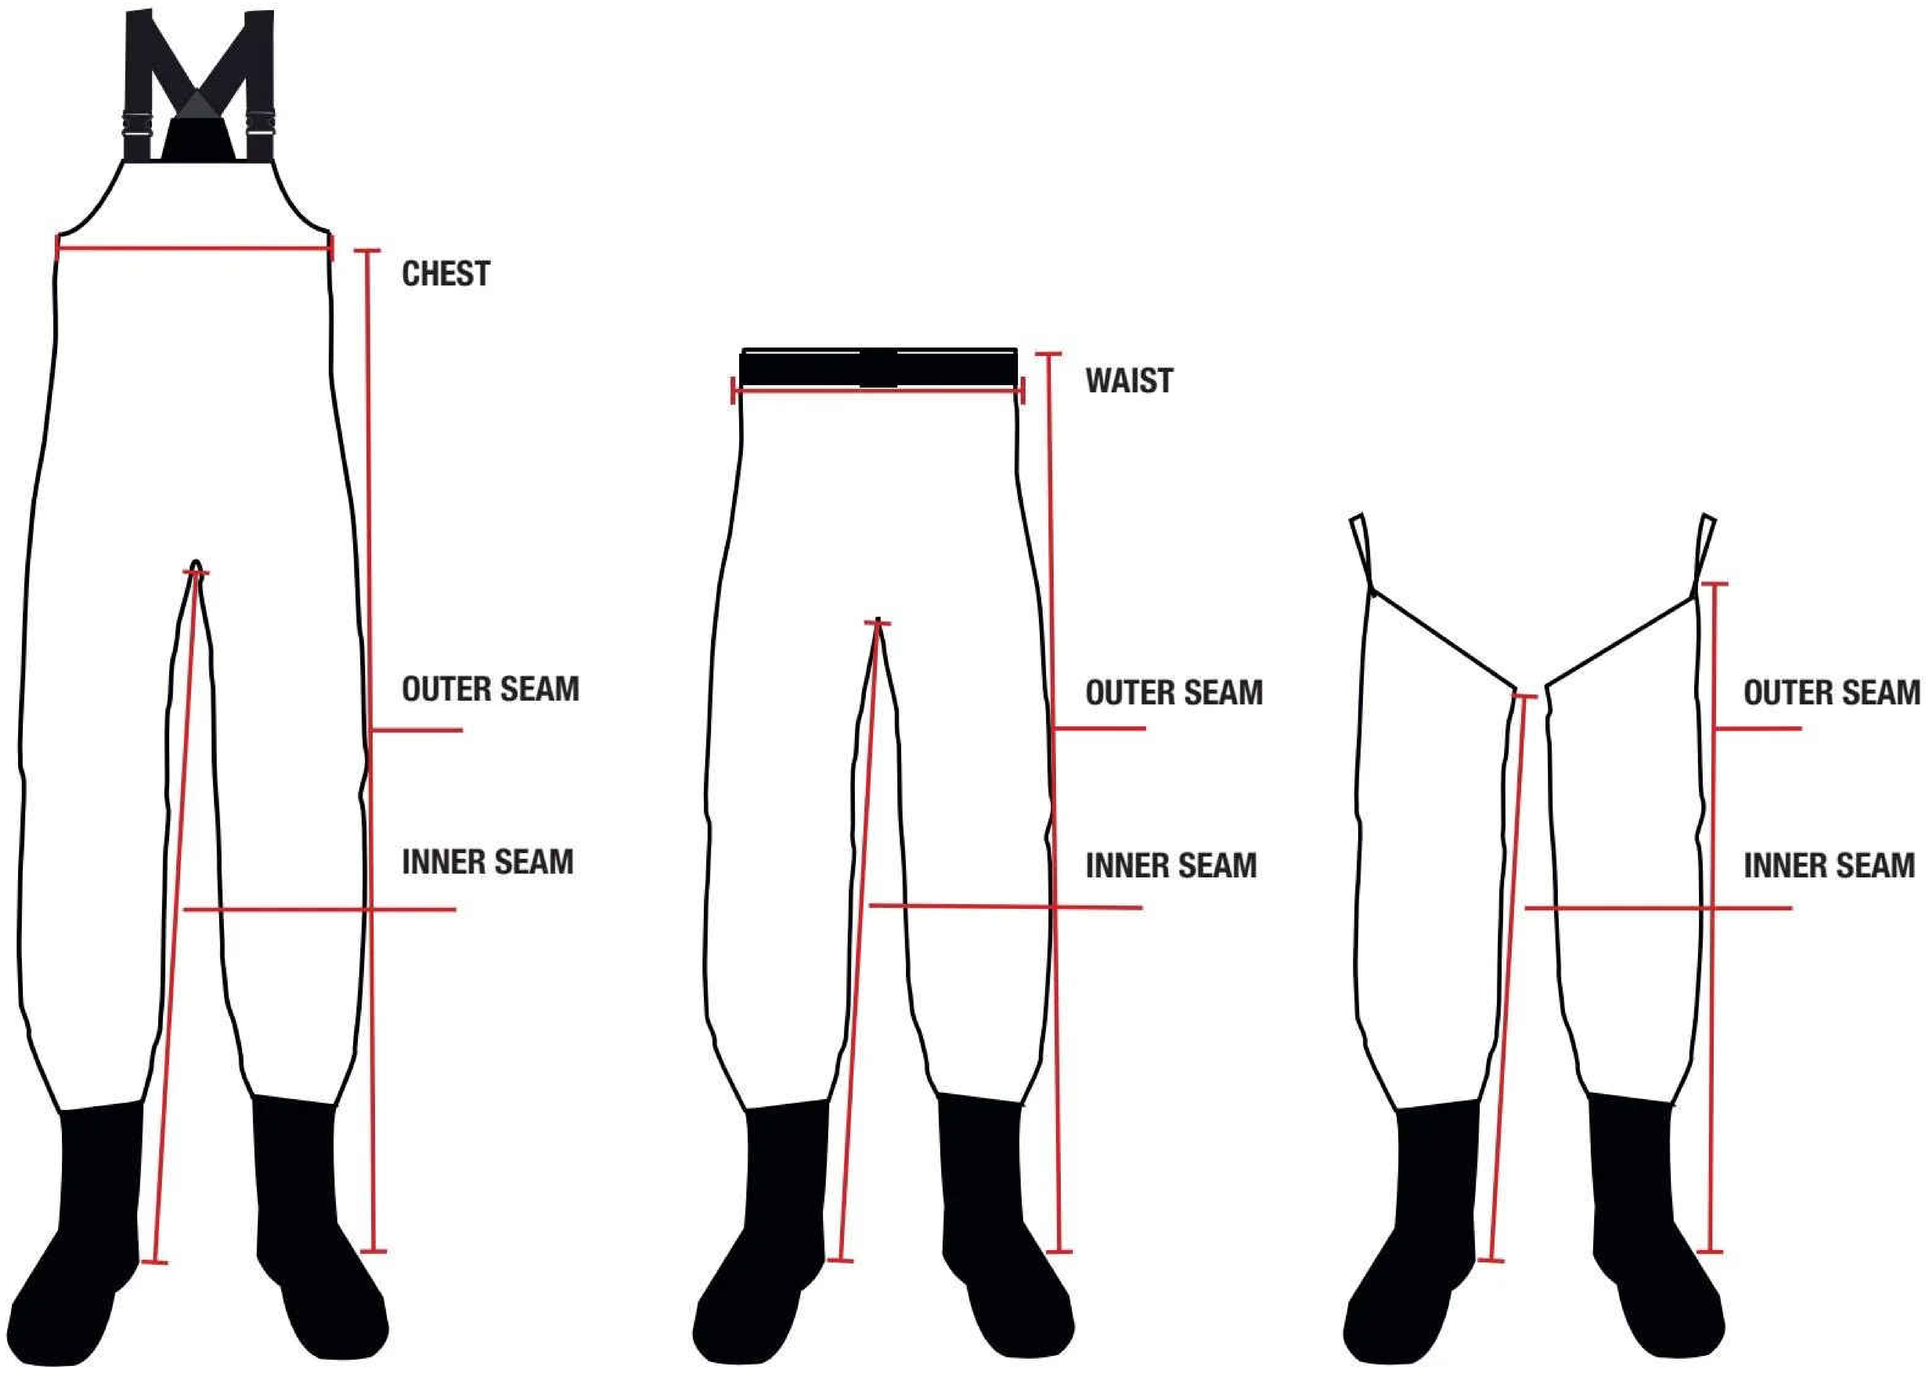

Measurements should be taken directly on your body!

Chest: Measure your chest over the fullest part
Waist: Measure your waist at the narrowest point
Seat/hip: Measure your hip around the fullest part of your hip

MEASURE WHERE LINES ARE SHOWN ON THE FIGURE

HOW TO MEASURE WADERS
