• New shaft located behind the line guide to avoid tangles and ruptures.
• Double shaft to prevent twistings and ruptures to the line guide.
• PTC voltage limiter which interrupts the electrical contact avoiding to burn the display or the motor in case of power overload.
• Drag cluster with additional disc brake to increase resistance and facilitate the centering on the shaft.

• Nuovo albero posto dietro il guidafilo per evitare attorcigliamenti e rotture.
• Doppio albero di contrasto per evitare torsioni e rotture al gruppo guidafilo.
• Limitatore di tensione PTC che interrompe il contatto elettrico evitando di bruciare il display o il motore in caso di surriscaldamento o sovraccarico di corrente.
• Gruppo frizione con aggiunta di disco freno per aumentarne la resistenza e facilitarne la centratura sull'albero.

[ITA] Non essendoci attualmente, a nostro avviso, parametri oggettivi utili al pescatore per certificare carichi di rottura e diametri reali dei monofili, Lineaeffe già da anni sta gestendo le indicazioni per i suoi prodotti con il sistema FISH TEST.
Questo test misura piuttosto affidabilmente la robustezza del filo durante l'azione in acqua:
è effettuato con 25/30 m di filo ed è inoltre basato sull'azione della canna, sull'elasticità del monofilo in prova, sulla resistenza della frizione di un mulinello di media qualità e sul contrasto del peso di un pesce vivo in acqua; naturalmente tutti i dati sono indicativi e possono variare in base alle condizioni sul campo.

LINEAEFFE 2021

[ENG] As there are currently, in our view, no objective parameters useful to anglers to certify breaking strength and actual diameters of monofilaments, Lineaeffe is handling these indications since years with the FISH TEST system.
This test measures rather reliably the strength of the monofilament during the action in the water: it consists of verifying the breaking strenght of 25/30 m of monofilament taking into consideration the action of the rod, the action of a medium quality reel and the contrasting strength of an alive fish into the water. All datas are indicative and may vary according to on-field conditions.

[FRA] Comme il n'y a pas, à notre avis, des paramètres objectifs utiles aux pêcheurs pour certifier charges de rupture et diamètres réels des monofilaments, Lineaeffe depuis années gère les indications de ses produits avec le système FISH TEST.
Ce test mesure plutôt fiablement la résistance du fil lors de l'action dans l'eau:
il est réalisé avec un échantillon de fil d'une longueur de 25/30 mètres en fonction de l'action de la canne et du poids d'un poisson vivant en pleine eau, le tout avec un moulinet de qualité moyenne; bien sûr toutes les données sont indicatifs et peuvent varier en raison de conditions de pêche.

[ESP] Dado que actualmente, en nuestra opinión, no estan de parámetros objetivos útiles para el pescador para certificar cargas de rotura y diámetros reales de monofilamentos, Lineaeffe, desde años, administra las indicaciones de sus productos con el sistema de FISH TEST.
Este test mide la fuerza de los hilos durante la acción en el agua y se efectúa verificando la resistencia de aproximadamente 25/30 m del hilo según la acción de la caña, de un carrete de media calidad, y del contraste de la carga de un pez vivo en el agua; por supuesto, todos los datos son indicativos y pueden variar debido a las condiciones del campo.

TAKE® MIMETIC
MIMETIC BLUE MICROPARTICLES / 100 mt.
INVISIBLE IN WATER

Le speciali nanoparticelle integrate nel filo simulano perfettamente plancton o altre particelle in sospensione nell'acqua mimetizzando completamente il filo. Gli esclusivi componenti della mescola riducono fortemente l'assorbimento dell'acqua e la formazione di ghiaccio. Take Mimetic affonda rapidamente e taglia l'acqua il 25% più velocemente rispetto ai fili standard.

The special nanoparticles integrated into the line perfectly simulate plankton or particles suspended in water camouflaging the line. The exclusive components of the compound greatly reduce water absorption and ice build-up. Take Mimetic sinks quickly and cuts the water 25%faster than standard monofilaments.

La sua superficie extra liscia permette lanci più lunghi e precisi.
Lo speciale intreccio a 8 capi rende questo filo incredibilmente resistente e durevole. Il profilo rotondo limita fortemente la deformazione in lancio ed elimina quasi totalmente l'effetto memoria.

The super smooth surface allows longer and more accurate casts. Thanks to the 8 strands weave this braid features incredible resistance and durability. The round profile limits deformation while casting and extremely lowers the memory effect.

VERKAUFSBEDINGUNGEN

Zahlungen: Im Falle von verspäteter Zahlung werden wir Verzugszinsen nach italienischem Recht, n.231/2002, erheben und alle ausstehenden Lieferung an den Kunden stoppen.
2) Bestellungen: Bestellungen unter einem Warenwert von 500,00 EURO kommen nicht zur Auslieferung. Jede Bestellung wird auf der Grundlage bestehender Warenverfügbarkeit zusammengestellt und Teillieferungen sind zugelassen – Kartons sind gebührenfrei.
3) Versand: Ware, die nicht in der Hauptlieferung enthalten ist, wird von unserem System erfasst und der nächsten Bestellung hinzugefügt. Sollte sich die neue Bestellung verzögern, wird die Ware gesondert verschickt. Kunden, die nicht an Rückstandslieferungen interessiert sind, haben dies dem Unternehmen bei Auftragserteilung unmittelbar mitzuteilen.
4) Eigentumsvorbehalt und Aufhebung des Vertrages: Der Käufer wird erst nach vollständiger Bezahlung der gesamten Rechnungssumme incl. aller anfallenden Kosten für Transport und Verpackung Eigentümer der Ware. Der Verkäufer behält solange voll umfänglich das Recht auf Eigentumsvorbehalt

7) Reklamationen nach Erhalt der Lieferung: Nach Punkt 6 sind Lieferungen inkl. aller Risiken versichert. Alle Kartons müssen durch Gurte und Bänder mit dem Aufdruck Lineaffe verschlossen sein. Sollte einer dieser beiden Voraussetzungen fehlen oder beschädigt sein, wurde die Ware beim Transport manipuliert. Empfängt der Kunde die Ware auf Paletten, die durch transparente oder schwarze Folie gesichert wurde, muss er die Kartons in Anwesenheit des Spediteurs auf Vollständigkeit und Schäden überprüfen. Das Original der Rechnung zur Überprüfung der Warenlieferung befindet sich im Karton Nr. 1. Im Falle von offensichtlichen Schäden bzw. Abweichungen hat der Kunde die Wareannahme so zu bestätigen, dass diese auf dem Frachtschein festgehalten werden, indem die beschädigte Ware/Kartons genau beschrieben sind. Damit wird die Grundlage für einen Regressanspruch beim Spediteur geschaffen, welche als Voraussetzung für die Transportversicherung unabdingbar ist. Wichtig: Schadeno.Beldungen auf der Kopie der Frachtpapiere, die nach dem Erhalt der Ware erfolgen, können nicht geltend gemacht werden da der Spediteur hier nicht in Regress genommen werden kann.
WICHTIG: DIE MELDUNG FÜR DEN SPEDITEUR MUSS IN DER KOPIE DES TRANSPORTDOKUMENTS DES KUNDEN UND DES SPEDITEUR ANGEGEBEN SEIN.
8) Mängelrüge: Fehlende und durch Transport beschädigte Ware muss innerhalb von 8 Werktagen nach Anlieferung schriftlich gerügt werden. Nach Ablauf dieser Frist können wir keine Reklamation, die durch den Transport entstanden ist, akzeptieren. Durch Spediteure entstandene Schäden, Brüche oder Verluste müssen auf dem Frachtschein festgehalten und uns per Fax innerhalb 8 Tagen gemeldet werden, da nach Ablauf dieser Frist auch kein Anspruch mehr an den Spediteur gerichtet werden kann. Im Falle einer Mängelrüge beim Spediteur auf dem Frachtbrief ist der Kunde dazu aufgefordert uns sofort mit der Liste der beschädigten bzw. fehlenden Ware zu kontaktieren, um einen Versicherungsanspruch gegenüber des Spediteurs geltend machen zu können. Sobald wir die beschädigte Ware vom Spediteur erhalten haben, werden wir die Ware erneut an den Kunden liefern oder eine Gutschrift ausstellen.
9) Garantie: Die Garantie auf die gekauften Produkte beträgt 2 Jahre ab dem Datum der ausgestellten Rechnung von Lineaffe nach D. LGS 24/2002 und 206/05, wirksam nach der europäischen Richtlinie Nr. 1999/44/CE.
