THE PERFECT BALANCE BETWEEN

PASSION AND BUSINESS

Change, whether we want it or not, is inevitable in 2021. Our goal is to build a stronger infrastructure, to invest in optimizing the value chain and to strengthen our organization and our position amongst retailers. This will be necessary to run a robust business in 2021, so we can keep providing a comprehensive range of the best products and services.

Healthy business keeps the passion alive

The tackle industry is run by enthusiastic people, who choose fishing as a lifestyle. We want to find the perfect balance between passion and business. Both are equally important and must be nurtured to the right extent. Passion is good, but a healthy business keeps the passion thriving.

Connecting with anglers

The digital distance between brands and anglers has never been shorter. By flicking a switch, you can get thousands of anglers watching live videos, asking questions and interacting with each other. We experience a closer relationship with anglers like never before. And they are all joining in – both new and experienced anglers.

Added value for retailers and consumers

The angling experience starts way before reaching the water. Often the dreams of fish start in the shops, by browsing through tackle. A good presentation of tackle is essential to the added experience. Being anglers, that spend vast amounts of time in nature, we also care. At Svendsen Sport, we are in the process of creating better and environmental friendly solutions to build an even stronger foundation for living a sustainable life. We do this by cutting down on the amount of plastics and finding alternative materials for packaging.

Trends are made. Not followed

We are dedicated to creating new trends that emerge through innovative tackle in coalition with strong marketing efforts that reach the end-consumers. We have done this many times before and we keep pushing the boundaries and surprising anglers across the world.

The never-ending season

Fishing can be performed 365 days a year. When one season is coming to an end, another fishing season is beginning. At Svendsen Sport, we provide several introductions a year, to keep up with the demand of changing seasons. This keeps the passion going all year round and retailers benefit from several products introductions a year.

DOUBLE-SEALED BALL BEARINGS

Double-sealed, stainless steel ball bearings. Keep grease inside and prevent aggressive saltwater from penetrating.

MICRO-FINE DRAG ADJUSTMENT

A micro-adjustable drag allows an angler to tighten (or loosen) the drag in tiny steps. So, it allows him to set the drag more accurately, which makes it possible to play a fish with more finesse.

METAL SPOOL

This symbol means that the reel comes with a metal spool.

INSTANT ANTI-REVERSE® SYSTEM

A special needle bearing stops the rotor from running backwards with perfect accuracy. So you are always in direct contact with the fish which makes very fast and penetrating strikes possible.

FREE SPOOL SYSTEM

Our free spool technique guarantees the fish can take line in a control manner with a closed bail. By turning the handle, the pre-adjusted front drag engages immediately.

FULL ALUMINIUM REEL

Reel body and rotor made from extremely strong and robust aluminium. Aluminium is not only lightweight, it is also rigid, so it won't deform the reel body and/or rotor when under stress, preventing the internal parts from damaging. This adds to the durability and reliability of a reel.

ANTI-VIBRO-SYSTEM

Anti-Vibro-System of D.A.M. includes dynamic balancing of flange and crank providing almost vibration-free running for more comfortable fishing and increased durability of the reel.

EFFECTIVE SPEED REGULATION

Instead of an extravagant gear system, our Quick® S-P-S multiplier reels feature a simple but effective power crank handle, adjustable in length. When playing a fish, the angler can effortlessly adjust the handle length. Use the short handle for fast retrieve and the long handle for more fighting power.

GRAPHITE SPARE SPOOL

This symbol means that the reel comes with a graphite spare spool.

WORMSHAFT SYSTEM

Enables extended spool lift, which is a major feature of modern long-range spinning reels. DAMYL® line will be perfectly distributed over the entire spool length, supporting the drag function and allowing longer and more accurate casts.

OVAL OSCILLATION SYSTEM

The patented OOS – Oval Oscillation System is basically logical evolution of our worldwide known S-Stroke System. OOS gives the reel outstanding smooth gearing, an extremely even line lay and a longer life than conventional reels.

METAL SPARE SPOOL

This symbol indicates that the reel comes with an aluminium spare spool.

S-STROKE SYSTEM (PATENT DE 4035846)

The outstanding S-Stroke System of D.A.M. directs the spool lift in a way that criss-cross lay of DAMYL® on the spool is made possible. Thus, even thin or wet braided lines do not cut in and glide off smoothly and perfectly.

ANTI-TWIST SYSTEM

Most of our reels have an Anti-Twist line roller. The concave shaped line roller minimizes the risk of DAMYL® line being kinked when being pulled of the spool.

SEALED BODY CONSTRUCTION

The inside parts, as well as the drag, are fully protected against aggressive saltwater by a unique Sealed Body Construction.

DISTANCE CASTING SPOOL

The ultra wide spool diameter combined with an extra low stroke provides extraordinary and precise distance casting abilities.

ALUMINIUM BODY

Body made of aluminium. Ideal material for heavy duty reels. Gives a reel maximum stability.

CARBON ROTOR

Carbon reinforced rotor for less weight and increased stiffness and strength. Doesn't bend easily. Handles extreme force better than standard graphite rotors.

LINE DISTANCE CONTROL

The Line Distance Control System allows the angler to cast the same length of line everytime, making sure he's able to fish permanently exactly on the baited spot or in front of a snag.

QUICK SNAP

Our patented Quick Snap handle system enables you to easily fold out the handle with just a single touch! This way you are able to store multiple rods in one hold-all safely without damaging any guides or DAMYL® line during transport.

CARBON BODY

Carbon reinforced body, to make it lighter, stronger and more durable than a normal graphite body.

MULTI DISC REAR DRAG

Multiple drag discs positioned in series transmit the adjusted drag power to the spool. Fine and easy setting of the drag is made possible even when playing the fish.

MULTI DISC FRONT DRAG

A drag system completely integrated in the spool.

STAINLESS STEEL MAIN SHAFT

A stainless steel main shaft makes a reel stronger and more durable. It will perform even under extreme conditions. It resists corrosion even in saltwater conditions.

DS CARBON DRAG SYSTEM

The dragwashers used in this system is a carbon fiber fabric that's laminated on both sides on fiberglass to provide stiffness on the washers which result in an ultra smooth and powerful drag. The dragwashers can be turned around as well which results in a brand new drag system.

CARBON DRAG SYSTEM

The dragwashers used in this system are made out of carbon fiber. These washers result in an ultra smooth and powerful drag.

FULL SPOOL MARK

The Full Spool Mark clearly indicates how far the spool should be filled for optimum efficiency. If overspooled there is an increased risk of casting windknots. If underspooled the maximum casting distance potential will not be met.

SALTWATER RESISTANT

The key components in this reel are saltwater resistant. These reels can be used under the most tough conditions and keep providing a smooth and strong performance.

CNC GEAR

Computerized Numerical Control Gear means that the gear inside this reel is produced from one solid piece of metal like Stainless Steel, Brass or Aluminium. The end result is a strong more precise gear box inside the reel which last even under the most toughest circumstances.

PRECISION BALL BEARINGS

Ball bearings reduce play and wear on rotating parts to a minimum, resulting in silent and smooth running reels. They also increase durability.

Quick[®]

FISHING REELS

www.quick-fishing.de

Quick® 7 FD

The Quick 7 series is the flagship in the entire Quick program. Engineered in Germany with only the best components for the advanced angler. This high speed reel is the perfect tool for salt- and freshwater applications like seatrout, seabass, pike, perch and other fierce predators. The gear feel and sealed drag system are super smooth and ready to start a fight with the fish of a lifetime. The innovative maintenance hatch makes it very easy to access the gear inside and put in some grease.

TECHNICAL DETAILS

- 11+1 Sealed stainless ball bearings
- High speed gear ratio
- Double sided sealed carbon drag system
- Maintenance hatch
- Saltwater resistant
- Winn® Grip handle knob
- Knurled spool
- Full spool mark
- Aluminum body and lightweight carbon infused rotor
- Anti twist lineroller
- Double anodized spool

Quick®

Quick® 6 SLS

Quick has a reputation when it comes to carp reels. Strong reels with a spool design for covering distances where needed. This is a series of 3 reels designed for distance casting. A regular size 7000 for the carp angler that needs to cast long distances to reach the fish but also two sizes smaller reels for the stalker or feeder angler. Slow oscillation for a perfect line lay, a slim body and a “carpy” design. Combines to make the perfect carp/feeder reel.

TECHNICAL DETAILS

- 6+1 Sealed ball bearings
- Double side carbon Quick® drag system
- Foldable handle with wooden handle knob
- Knurled spool
- Full spool mark
- Ultra slow oscillation
- Graphite body and rotor
- Two line clips
- Anti twist lineroller
- Double anodized spool

Quick®

Quick® 5 FD

The Quick 5 series is a saltwater resistant reel with a smooth gear feel and a very strong and stable gear at the same time. The carbon drag system provides a super smooth drag that is so important while fighting the fish of a lifetime. The strength of an aluminum body in combination with a light weight carbon infused rotor makes sure that the angler will be able to cast all day. A great reel for saltwater spinning applications as well as freshwater spinning.

TECHNICAL DETAILS

- Carbon infused rotor and aluminium body
- 7+1 Sealed stainless ball bearings
- Carbon drag system
- Super smooth gear feel
- Knurled spool
- Full spool mark
- Ergonomic EVA handle knob
- CNC machined handle
- Saltwater resistant

Quick® 4 SLS FD

The new QUICK® 4 SLS reel features a strong but lightweight graphite frame with ABS/1K carbon side-plates, a forged and machined Super Long Stroke aluminium spool, 6+1 stainless steel sealed ball bearings for smoothness under heavy retrieve pressure, a powerful but smooth, sealed, carbon fibre drag system. Built in super slow oscillation gives incredible line-lay over the spool for long distance casting performance with braid and mono lines and is saltwater resistant to minimise long term corrosion. Ideal for all long distance carp angling.

TECHNICAL DETAILS

- 6+1 Sealed stainless steel ball bearings
- Sealed carbon drag system
- Worm shaft with super slow oscillation
- Dark wooden handle knob
- Stainless steel 7mm diameter main shaft
- Diecast zinc alloy main gear
- Machined brass pinion gear
- Quick drag system

Quick® 4 SLS FS

The new QUICK® 4 SLS FS reel features a strong but lightweight graphite frame with ABS/1K carbon side-plates, a forged and machined Super Long Stroke aluminium spool, 6+1 stainless steel sealed ball bearings for smoothness under heavy retrieve pressure, a powerful but smooth, sealed, carbon fibre drag system. Built in super slow oscillation gives incredible line-lay over the spool for long distance casting performance with braid and mono lines, plus the reel offers a free spool function and is saltwater resistant to minimise long term corrosion. Ideal for all long distance carp angling.

TECHNICAL DETAILS

- 6+1 Sealed stainless steel ball bearings
- Sealed carbon drag system
- Freespool function
- Worm shaft with super slow oscillation
- Dark wooden handle knob
- Stainless steel 7mm diameter main shaft
- Diecast zinc alloy main gear
- Machined brass pinion gear
- Quick drag system

Quick®

Quick® 3 FD

The Quick® 3 series is another development in the entire Quick® program. Engineered in Germany with only the best components. This complete range of reels contains small reels for light spinning but also freespool reels and some big sizes which are suitable for catfish and other heavy duty styles of fishing. Strong enough to resist the most fierce fish. Super smooth drag system, strong and reliable gear ready for any adventure at the bank. Available in the sizes 1000- 9000. Next to that there is a Quick® 3 SLS available for long distance carp fishing and beachcasting.

TECHNICAL DETAILS

- 9+1 Steel ball bearings of which 3+1 stainless ball bearings
- EVA handle knob
- Knurled spool
- Lightweight graphite rotor and body
- Anti twist lineroller
- Double anodized spool

Quick®

QUICK® OPTIMUS 301 BAITCAST

Heavy duty, aluminium baitcast reel, meant for longer and thicker lines, king size lures and... big fish. The Quick® Optimus 301 is the perfect match for the EFFZETT® Optimus Lure Shooter rod, for instance. In combination with this rod and a big EFFZETT® Pike Seducer or Catfish lure you have a truly fantastic combination to catch the biggest of the biggest pike.

Equipped with six sealed, saltwater resistant ball bearings plus two Japanese ball bearings to support the thick, stainless steel main shaft and an instant anti-reverse® needle bearing. Left-hand and high speed (7.3:1) gear ratio. The drag is sealed. Carbon washers ensure a drag force of 12 kg.

The Quick® Optimus 301: a powerful tool for powerful fish.

TECHNICAL DETAILS

- 8 stainless steel ball bearings
- 1 Japanese instant anti-reverse® needle bearing
- Aluminium body with graphite side covers
- Aluminium spool
- Brass wormshaft oscillation system
- Multi disc drag with carbon washers
- Adjustable magnetic break system
- Stainless steel main shaft
- Aluminium star drag
- Gear ratio: 7.3:1
- Weight: 280g
- Dragforce: 12kg

FISHING TACKLE

www.dam.de

NANOFLEX PRO

NANOFLEX PRO

The DAM® Nanoflex Pro is the third generation of the popular Nanoflex rod range that thousands of fisherman around the world rely on for so many years. With the YouTube movie "Amazing! Unbreakable fishing Rod", which has been watched over 800.000 times, DAM proved that the Nanoflex rods are really as strong as as we've stated. The movie shows an angler standing on a forklift and lifting a full crate of water with a Nanoflex rod, unbelievable!

The Nanoflex Pro comes with the same durability as the previous generations, but offers faster, more sensitive blanks, a modern face lift plus a huge weight reduction. In short, the best Nanoflex rod we've ever made.

TECHNICAL DETAILS

- Durable, slim and light weight 24TC carbon blanks
- Lightweight quality guides
- Full cork handle
- High grade black EVA foregrip with rubbercork finish
- Rubber cork but cap

CULT-X

The Cult-X series is a very complete series with incredibly good value for money. By using slim and lightweight 30TC carbon blanks these rods feel incredibly well balanced. The fast action makes these rods perfectly suitable for lure fishing for perch, pike and Zander. The wide range also includes very light casting weights which are great for all lighter fishing disciplines like trout fishing or drop shot fishing. The series also includes a variety of casting models covering all techniques from vertical jigging up to heavy jerk baiting or big soft lures. The Cult-X rods have a very good looking cross woven blank finish and a fresh and recognizable white window which holds all the important information as well as the cool Cult-X logo.

TECHNICAL DETAILS

- Sensitive and lightweight 30TC carbon blanks
- Modern K-frame guides + Micro guides
- Hi-grade cork and EVA handle
- Cross-carbon blank on the butt section
- Fast action

RODS

DAM

YAGI CLASSIC SPIN

The DAM Yagi Classic rods are, as the name says a more classic looking variation of our very popular Yagi rods. But only the look is more classic, the Yagi Classic rods come with the same fast, slim and lightweight blanks and modern K-guides as the normal Yagi rods. The elegant and timelessly beautiful cork handles are held very slim and make these rods a pleasure to fish with for a whole day. The Yagi Classic series features a wide range of casting weights, ranging from the very popular ultra-light models with 1-5g up to the heavier versions for pike fishing with 30-80g.

All together the Yagi Classic series is a very complete range, with great rods with excellent value for money.

TECHNICAL DETAILS

- IM8 high modulus carbon blanks
- K-frame guides + Micro guides
- Laser engraved butt cap
- High grade EVA two-piece handle
- Fast action

YAGI

The DAM Yagi is the next generation of our extremely popular EFFZETT Yagi rods. For the new DAM Yagi we took a close look on the key components like blanks and guides. All blanks have been re-worked to improve the already fast action and the sensitivity of these rods. One of the most significant changes are the much lighter K-guides that will come with all models. We kept the well-established color scheme as it is. Light grey and dark grey have been added for the new DAM Yagi Light Jig and Ultra Light Jig models.

All together the new DAM Yagi series offers a much better product in all points, be it design, action or the assortment itself.

TECHNICAL DETAILS

- IM8 high modulus carbon blanks
- K-frame guides + Micro guides
- Laser engraved butt cap
- High grade EVA two-piece handle
- Fast action

YAGI LIGHT SPOON

The DAM Yagi Light Spoon rods are specially designed for fishing with light spoons but can also handle other small lures like small soft lures. The incredibly sensitive carbon solid tips detect even the slightest bites and due to the semi-parabolic bending curve, these rods offer incredible safety while playing the fish and great fun even with smaller fish. Yagi Light Spoon rods are built with the same blank technology that is used for all our extremely popular Yagi rods. Equipped with low leg K-frame guides and a down-screw reel seat.

TECHNICAL DETAILS

- IM8 high-modulus carbon blanks
- Carbon solid tip
- K-frame guides + Micro guides
- Butt cap with laser engraved DAM logo
- High grade split EVA handle
- Moderate action

QUADRA SAFAR

QUADRA SAFAR SPIN

The Quadra Safar rod series includes 5 models of 4 piece travel rods. These rods covers all types of fishing from light to medium heavy. The stiff blank actions and the double legged guides make the Quadra Safar suitable for spinning and fishing with natural bait as well. Each rod comes in a solid PVC tube that protects the rod during transit. A great travel rod series that leaves no wishes open.

TECHNICAL DETAILS

- High quality 24TC carbon blank
- Strong guides with black finishing
- High quality EVA fore and reargrip
- Fast action

SHADOW TELE

The DAM SHADOW Tele rods convince not only with their very thin, light and fast 24TC carbon blank and the use of high-quality components, but also with their modern and timeless design. The Shadow Tele rods are equipped with light but resistant wrapped guides, which means that the action is much faster than with conventional telescopic rod rings. The rods are very good and balanced in the hand and the interaction of the camo-EVA fore grip with the classic cork handle makes the rods a real eye-catcher. The semi-parabolic action cushions head butts and quick escapes but still offers enough power reserves to land even capital fish safely.

TECHNICAL DETAILS

- Slim, light and powerful 24TC carbon blanks
- Moderate-fast action
- Black anodized metal parts
- Light-weight single-leg wrapped guides
- High grade full cork handle
- Camo-EVA fore grip

SHADOW TELE MINI SPIN

The name Shadow Tele Mini Spin is based on the characteristic feature that has made these fishing rods unique and extremely popular for many years. This feature is the incredible short transport length, which makes them perfectly suitable as travel rods or if fishing is not priority one on a day hiking in nature. With the Shadow Tele Mini Spin in the backpack there is no chance of missing out on making a few casts on a new and interesting fishing spot. The latest generation comes with wrapped guides instead of the old fashioned and heavy standard tube guides. This updated guide setup reduces the weight on the blank and due to that the already fast and responsive action feels even better. The timeless design and the use of quality components makes these rods a pleasure to fish.

TECHNICAL DETAILS

- Slim, light and powerful 24TC carbon blanks
- Moderate-fast action
- Black anodized metal parts
- Light-weight single-leg wrapped guides
- High grade full cork handle

ADJUSTA TELE TROUT

The Adjusta Tele Trout has a very special but absolutely useful feature, it is possible to adjust the length of this rod according to the river that is fished in. Small creeks with shallow water require very silent movement from the angler, that's when the angler should use the full length of the rod to stay away from the water as far as possible. At bigger rivers with normally deeper water it is not so super important to stay far away from the bank, here the angler can use the rod in its minimum length for more comfortable fishing. The Adjusta Tele Trout rods are equipped with a very sensitive tip to detect even the most careful bites, but at the same time, their backbone is strong enough to fight the trout of a lifetime.

TECHNICAL DETAILS

- High quality 24TC carbon blank
- LTS quality guides
- Black stainless steel metal reel seat
- Rubber coated handle for perfect grip

POWER TROUT SYSTEM RODS

Fishing for trout in so-called “put and take lakes” is still immensely popular and gets more and more refined. Therefore DAM has upgraded its PTS Trout System (better known as PTS) carbon rod series. Regardless if the angler wants to use spinners, finesse lures, floats or bombarda’s, there is a dedicated rod available in the overworked PTS rod series.

PTS SBIROLINO

Telescopic, 24 ton carbon rod specially designed for sbirolino fishing at long distances. Casting weight: up to 28 gram.

XT5

The DAM XT5 series offers beautiful, high quality but affordable carp rods, equipped with the increasingly popular anti-tangle K-frame guides. Made of 30TC carbon, these light yet powerful rods are true distance rods, offering the right performance needed to reach the holding and feeding areas of weary carp. As a result, all 12ft and 13ft models come with a size 50 starting guide. The short 2,75m version is specially designed for stalking, boat fishing or fishing just a few wraps away from the bank. Rods with an attitude!

TECHNICAL DETAILS

- Slim, lightweight and powerful 30TC carbon blanks
- Real spigot connection for maximized strength
- Black anti-tangle K-frame guides
- DPS reel seat with black hoods
- High grade EVA fore and rear grip
- Black anodized metal parts
- Laser engraved aluminium butt cap

XT5 SPOD & MARKER

The DAM XT5 Spod & Marker is a powerful, high quality rod that has all it needs to make long accurate casts with Spombs, bait rockets and heavy marker floats. The XT5 Spod & Marker rod is equipped with anti-tangle K-frame guides that practically eliminate the chance that the line tangles around the starting guide or that the knot of the shock leader gets stuck and everything breaks. The size 50 starting guide together with the fast 30TC carbon blank are the foundation of these amazing distance rods.

DAM

NEWAVAILABLE
JANUARY 1ST 2021**XT1**

Although it might sound like a familiar marketing cliché, there really is something out of the ordinary about the XT1 rods, that simply makes them stand out. What makes the XT1 rods so convincing is simply how much rod you get for your money. Like the previous generation, also the latest XT1 rods are built with the same slim, lightweight and extremely powerful 24TC carbon blank that handles casting to enormous distances with ease. The updated XT1 rods are equipped with local Minima guides, which are not only much lighter than the old guides, but also offer a better performance and look.

A great side effect is that the decreased weight of the guides is directly resulting in an improved casting performance!

We dare say that there is a rod for everybody, because the range covers pretty much every need, from short and light until long and heavy, many with a size 50 starting guide. To round this anyway complete series of, there are 2 great telescopic models and beast of a Spod & Marker rod.

TECHNICAL DETAILS

- Slim, lightweight and powerful TC24 carbon blanks
- Fast action
- Light, durable and modern local Minima guides with black frames
- High grade EVA foregrip and sanded non-slip rear grip for power casting
- DPS reel seat with black hoods
- Cross woven window pattern
- Black anodized aluminium butt cap

XT1 TELE

The two XT1 Tele models also come with the same slim and powerful blank construction as all other XT1 rods. Both the 3,60m and the 3,90m are equipped with size 50 local Minima guides, resulting in an extremely good performance. These telescopic carp rods are a reliable and easy to transport alternative for everybody who has to keep his equipment as compact as possible.

Trade Unit 1

DETEK

The DAM DETEK rod series is the new flagship coarse fishing rod series within DAM.

Built with extremely slim, lightweight but powerful 24+30TC carbon blanks and equipped with high quality components such as SeaGuide guides, these rods offer an incredibly high level of performance. The wide range offers the right rod for the modern coarse angler to match nearly every situation. From the light and short Picker, to the parabolic Method Feeder and more powerful normal Feeder rods with actions ranging from light to xx-heavy, over to the super lightweight Match rods, the DAM DETEK series offers the right rod for every fishing style.

TECHNICAL DETAILS

- Extremely slim, lightweight but powerful 24+30TC carbon blanks
- Matt blank finishing
- High quality SeaGuide guides
- Downscrow DPS style reel seat
- 3 carbon quiver tips
- D-shaped hook keeper
- Premium AA cork handle with EVA fore and rear grip

RODS

DAM

DETEK PICKER

The DAM DETEK Picker has an extremely lightweight and semi-parabolic 24+30TC carbon fiber blank and is equipped with premium components, such as the incredibly minimalistic but strong and lightweight SeaGuide guides. The blank fully loads up already with lightweight feeders and easily catapults the rig to long distances. The 3 carbon quiver tips reliably indicate also softest bites and absorbs head shakes and fast movements of the hooked fish perfectly. The strong backbone offers enough power reserves to also stay in constant control of larger specimen.

DETEK METHOD FEEDER

The parabolic action of the DAM DETEK Method Feeder rods makes them ideal for method feeder fishing. The rather soft action allows soulful casts to both short and long distances without losing the feed from the method feeder. Furthermore, the parabolic action ensures less hook pulls during the fight and optimally cushions sudden and violent bites. During the cast, the fast 24 + 30TC carbon blank recovers quickly and returns to its starting position, what makes it easier to make accurate casts repeatedly.

DAM

DETEK FEEDER

The DAM DETEK Feeder rods are developed for feeder fishing for almost all coarse fish such as bream, tench, barbel and carp. The powerful 24 + 30TC carbon rod blanks paired with a very fast action gives these rods enough power reserves and great casting properties which make it easy to reach long casting distances. The DETEK rod series should have the right rod for every purpose, from light casting weights for fishing in small ponds or streams, to the XX-Heavy Feeder, which is, with a length of up to 4.20m and casting weights of up to 240g, ideal to fish with heavy feeder cages on big rivers or other large bodies of water.

DETEK MATCH

The DAM DETEK Match rods convince with a very thin blank diameter, light weight and the use of high-quality components such as SeaGuide guides. The rods have a great balance and the fast 24 + 30TC carbon blank makes it easy to reach excellent casting distances even with the lightest rigs. During the fight, the parabolic action cushions head shakes and quick runs safely what enables the use of thin leaders and main lines without the risk of losing a fish due to line breakage.

SENSOMAX II

The DAM Sensomax II series is the follow up on our very popular DAM Sumo Sensomax series. In close cooperation with our feeder fishing experts we developed every model from scratch. The Sensomax II series has faster, slimmer and more powerful blanks than its previous version and the design is reworked and modernized completely as well. The wide range of Quiver, Picker, Feeder, Match and Bolo rods covers everything from fishing small still waters for roach, bream or tench up to fishing the big European rivers for carp or barbel. Each Sensomax II Quiver, Picker or Feeder rod is delivered with 3 different tips in a protection tube. DAM Sensomax II rods are built by anglers for anglers.

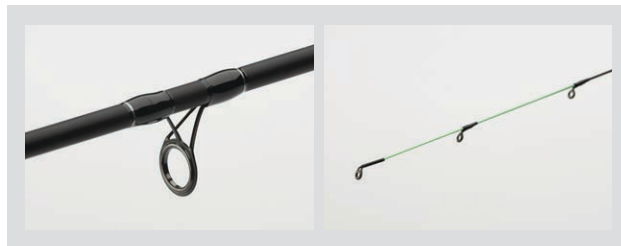

TECHNICAL DETAILS

- Powerful, slim and lightweight 24TC carbon blanks
- Hi-grade EVA fore grip and quality cork handle
- Down locked reel seat with black metal hoods
- Black guides with slim braid resistant SIC inlay

SENSOMAX II QUIVER & PICKER

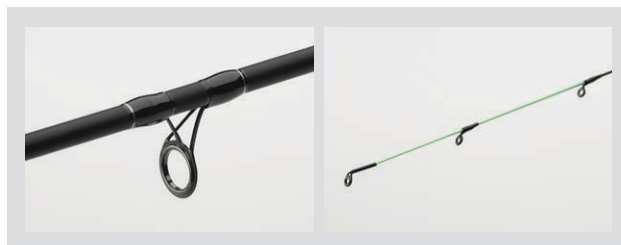

The DAM Sensomax Quiver and Picker rods are the perfect choice for targeting fish like roach, bream, tench and small carp in ponds or small rivers.

DAM

SPEZI STICK II

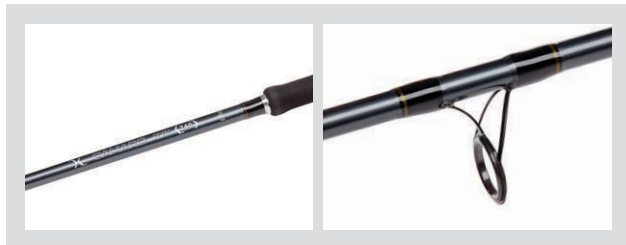

The DAM Spezi Stick II rods are the latest generation of one of the most popular and successful DAM rod series of all time. The DAM Spezi Stick II rods are built with a totally new carbon blank, with a much better action, smaller diameter and lower weight as well as with more modern and slim guides. The fresh and modern design with the exclusive looking cross-carbon blank surface make the Spezi

Stick II series a strong successor. Even after all the improvements we made, the Spezi Stick II rods are available for a very attractive price and cover every fishing technique in freshwater. To make the identification of the various rods clearly and to facilitate the assignment, the respective target fish is printed directly on the rod blank.

G-FLY ROD

Most likely one of the highest quality and best looking 4-piece fly rod series DAM ever made. In a modern green colour and with an excellent quality cork handle. The G-Fly punches way above its weight in terms of value for money and comes in at just a fraction of the price you'd expect to pay for a rod of similar performance and specification. Constructed from 30T carbon, the weight, action and balance can only be appreciated when handling this superb fly rod.

FORRESTERFLY II COMBO

Since fly fishing is getting more and more popular, many people get inspired and interested in trying fly fishing for themselves. But a lot of beginners give up before they even started, because they don't know what they need, and they see that it seems to be very difficult to buy the right products and expensive at the same time. To eliminate both problems is exactly why the DAM Forrester Fly II Allround Fly Fishing Set is created. Everything that is needed to start the art of fly fishing is included in this set. Next to the good quality carbon fly rod with an aluminum reel seat there is an ABS graphite fly reel, which is already spooled with backing and fly line and a fly leader. Together with the flies in the small fly box that is also included, there is everything that is needed to start fly fishing for a very reasonable price.

TECHNICAL DETAILS

- Four-piece carbon fly rod 2,70 m #5/6
- ABS-graphite fly reel #5/6
- Forrester Fly Backing 25lb/ 60m
- Forrester Fly Line WF5F (weight forward, floating)
- Forrester Fly Leader
- Fly box including flies

CROSSPOWER BRAIDS

With the Crosspower Braid DAM offers a high quality braided line in 4-braided and 8-braided construction for an outstanding price-performance ratio. Crosspower Braid lines are braided with the most modern technology available

and following highest quality standards, what makes them extremely versatile. Among the available diameters of 0.10mm up to 0.22mm, there is always the right line, be it for light spinning for trout and perch or for heavier pike fishing.

DAMYL TECTAN SUPERIOR MONOFILAMENT LINES

The DAM Danyl Tectan may very well be one of the oldest, established monofilament lines on the market today. One of the reasons for this success is undoubtedly that the brand evolved its lines according to the latest trends and technology.

One of the most remarkable features is the special and secret UV-protection treatment that makes the Tectan lines more durable and superior than other, ordinary monofilaments.

DAMYL® TECTAN SUPERIOR 25M

- UV-protective surface treatment
- Low visibility
- Low memory
- Super abrasion resistant
- Medium elongation

SALT-X SANDEEL BLADE

The body profile of the Salt-X Sandeel Blade is a perfect imitation of a real sandeel. The slim blade shaped body makes the lure perfect for extreme distance casting and gives the lure a very attractive and erratic action. The key for triggering the most aggressive strikes are short spin stops every now and then. Already at the shortest spin stops the Salt-X Sandeel Blade immediately has an irresistible 360-degree rotation that sends out huge pressure waves and an immense flash under water.

TECHNICAL DETAILS

- Extremely realistic body profile
- Perfect long cast design
- Bright and flashing UV colors
- Lively action
- Intense 360-degree rotation on the drop
- Ultra sharp saltwater proof treble
- 100% lead free

SALT-X MACKEREL CASTING JIG

The DAM® Salt-X Mackerel Casting Jigs and pilks based on the body profile of a real mackerel and come with very realistic details.

The casting jigs are specially designed for casting long distances from the shore-line and available in 30g, 50g and 70g. They come with a front assist hook and a treble hook in the back-ready to use right out of the package. The carefully balanced bodies create a strong and erratic wobbling action that is perfect for drawing the attention of any saltwater predators. Salt-X Mackerel Casting Jigs have an incredibly wide speed window and can be fished in many ways: fast retrieve, erratic jerking or jig and drop style where the fish hit it while it flutters down horizontal to the bottom, creating the natural flashing action of a dying bait fish.

TECHNICAL DETAILS (CASTING JIGS)

- Extremely realistic body profile
- Perfect long cast design
- Lively action
- Bright and flashing UV colors with printed details
- Erratic flutter and flash action on the drop
- Ultra sharp saltwater proof EFFZETT treble
- Ultra sharp saltwater proof EFFZETT braid assist hook.
- 100% lead free

SALT-X MACKEREL PILK

The Salt-X Mackerel Pilks are designed for vertical fishing from a boat available in 100g and 150g. They are equipped with a 6x strong saltwater proof treble that can easily deal with the biggest deep-sea monsters in the oceans. The Salt-X Mackerel Pilks have a slow erratic fall with a strong flutter and flash action, that creates huge pressure waves and a deadly attraction for all saltwater predators.

TECHNICAL DETAILS (PILKS)

- Extremely realistic body profile
- Bright and flashing UV colors with printed details
- Erratic flutter and flash action on the drop

SALT-X PILK/BLADE LURE

Fabulously looking lead fish that can be used in the classic, traditional way (hanging head down) or... as a blade lure for a narrower, more aggressive action. How to fish it simply depends on the fishing conditions, type or even the mood of the targeted fish. Features a high quality, 6X strong, salt water resistant treble.

HI CARBON ULTRA SHARP – THOSE HOOKS ARE THE SHARPEST THING!

We have composed the ideal leaders for all popular species and types of fishing to facilitate your choice from a multitude of hook sizes, hook shapes, line diameters and leader lengths. Hook sizes and shape as well as the DAMYL®'s breaking strain and suppleness are perfectly matching. Each leader is hand-tied and tested for tensile strength.

SPEZI LEADERS

For each popular fish species, fishing method or bait we have composed the ideal leader, using the most suitable hook model and best matching Tectan Danyl Superior monofilament line per species or method, in the ideal length. Each model is available in different sizes, to meet different local fishing conditions. For everybody's convenience we placed a picture of the targeted fish species/method/bait on the packaging.

NOW

DETEK FLEX FEEDER WITH SWIVEL

The perfect feeder cage to fish unnoticed even in clear waters. The camouflage design of the cage makes it practically invisible under water. Through the many openings, the water can quickly penetrate the cage so that the bait is quickly pressed out of the cage. The built-in swivel helps to avoid tangles.

DETEK METHOD FEEDER INLINE

The ribs of the DAM DETEK Inline Method Feeder are ideally suited to safely transport both method groundbait and soaked pellets to the fishing spot. Once at the bottom of the water, the DETEK Inline Method Feeder quickly releases its load, the fish can quickly find and suck in the groundbait and, of course, the hook bait. In connection with our Method Feeder Mold in the appropriate size, weights of the same size are always achieved, which enables precise casting. The aerodynamic design makes accurate throwing easier. Instead of the swivel, our DAM DETEK Quick Change Bead can also be used.

Trade Unit 1

DETEK PELLET FEEDER INLINE

The inline version of the DAM DETEK Pellet Feeder has been specially developed for fishing with pellets. The aerodynamic design helps to throw the basket precisely at the spot. In addition to pellets, this feeder can also be used to cast sticky maggots. Due to the half-open design, the pellet feeder is easy to fill with one hand. Instead of the swivel, our DAM DETEK Quick Change Bead can also be used.

Trade Unit 1

DETEK MAGGOT FEEDER WITH SWIVEL

As its name suggests, the DAM Maggot Feeder with Swivel is designed for feeding loose maggots. These crawl out of the holes little by little and provide the fish with the little crawlers. Through the adjustable holes, the feeder cage can be adapted to the situation. Due to the center of gravity at the end, the cage flies very stable and thus ensures precise casts. The swivel prevents tangles.

Trade Unit 1

DETEK PELLET FEEDER ELASTICATED

The DAM DETEK Pellet Feeder Elasticated has been developed for fishing with pellets. The built-in elastic protects the fish in the fight because the elastic works as a shock absorber. The aerodynamic design helps to throw the basket precisely at the feeding spot. Apart from pellets, this feeder can also be used to transport sticky maggots to the site. Due to the half-open design, the pellet feeder can be easily filled with one hand.

HAMMERHEAD LANDING NET

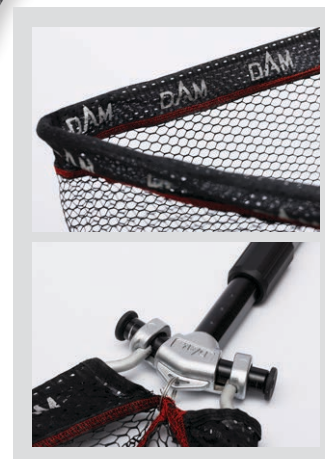

Our „Bärenstark“ or Hammerhead landing nets are most probably the sturdiest and most durable landing net in the world since years! Now the best has become better with a new three point connection in the landing net handle. These high quality landing nets have a cast aluminium link which secures the net frame to the pole. The sturdy folding mechanism can be operated with just one hand. At the touch of a button, it can be opened and folded down again to save space. Available in a two and three section telescopic handle and manufactured of bend resistant aluminium and can be smoothly locked in position with a twisting action. The rubberised nylon net is stretched open with strong perlon wire ready for the catch. The rubberised net has several advantages: The hook can easily be removed, it sinks quickly in the water, it don't get tangled and it can easily be cleaned with no remaining smells.

- Easy-to-handle, foldable ultra strong aluminium head
- Rubber coated mesh
- Secure handle locking system to change the handle length
- Very strong and weight optimized handle
- Compact transportation size

CROSSPOWER LANDING NET

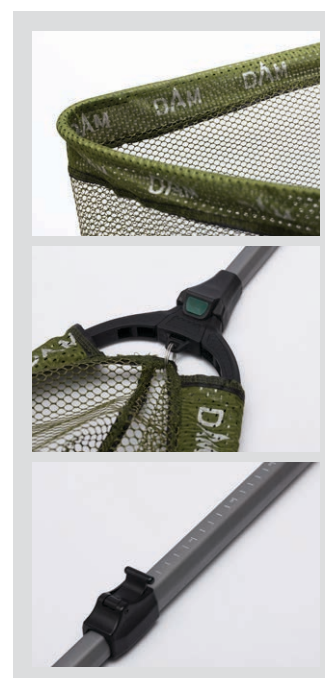

This compact telescopic landing net series has lots to offer for today's active angler. The versatile nets are durable, compact to transport, easy to handle and feature mesh with a rubber coating. Thanks to this rubber coating, the net is unable to absorb water and thus can be stowed away directly after fishing without getting stinky. It is also makes the net lighter when it is used frequently during the fishing day. Another advantage is that the hook will not get tangled in the mesh as easy as with commonly used nets. This series is the perfect partner for mobile predator anglers! Available in a two and three section telescopic handle and in five different sizes.

- Easy-to-handle, foldable nylon-graphite head
- Rubber coated mesh
- Secure Cam-Lock handle locking system to change the handle length
- Very strong and weight optimized handle
- Compact transportation size

BIG FISH NET FOLDABLE

The DAM Foldable Big Fish Net is a very practical allround landing net where also the biggest fish will fit in easily. The problem of fitting the net in the car or having problem while carrying big nets to the spot have an end now. This is because the frame is foldable and can be reduced in size by 50% with this function. The handle can also be moved up once the net head lock is unlocked. This is helping to reduce the size even more. The net material is fast drying and with a hole diameter of 10mm the net can be moved easily through the water.

DAM

FLOATING LANDING NET XL

The DAM Floating Landing Nets have been proven to be very successful and with the XL version this range is complete. The long handle (110CM) makes it easier to land the fish while fishing in a Belly Boat or when the angler just need a couple of extra centimeters to land the fish of a lifetime. It is also a great help for unhooking fish because the net can never get lost. The rubber mesh solves the problem of hooks getting stuck in the net, dries quickly and is practically resistant to any smell. The fabric around the frame minimizes the chance of losing a fish during netting because the hook gets stuck in the mesh.

EXTREME NYLON NET

The DAM Extreme Nylon Net, the name already explains it. A heavy duty net with an aluminium handle and frame where also the biggest fish will fit in easily. The special mesh is made of a special nylon cord which is very durable, has a big mesh and doesn't tangle with hooks. The handle can be moved up once the net head lock is unlocked. This is helping to reduce the size during transport. The special net material is fast drying and with a mesh diameter of 40mm(!) the net can be moved easily through the water.

FLOATING LANDING NET

The DAM Floating Landing Nets are floating with the full frame on the surface. This is a great help for unhooking fish because the net can never get lost. The rubber mesh solves the problem of hooks getting stuck in the net, dries quickly and is practically resistant to any smell. The fabric around the frame minimizes the chance of losing a fish during netting because the hook gets stuck in the mesh. The 3 available shapes cover all fishing styles from fly fishing, to seatrout fishing or spinning for predators.

HI-T BITE ALARM SET

The ultimate combination of style, simplicity and functionality.

Our Hi-T alarms have gained quite a reputation since their introduction a few years back. They feature all standard functions you would expect from a modern-day bite alarm... and much more! Aside from the adjustable volume, tone and sensitivity we added a dedicated dropback LED and tone. It conveniently tells you whether or not you had a liner or an actual dropback take, even at 3AM in the night, when you're lying in a warm sleeping bag. On the rear of the alarm there is a lighthouse LED, allowing you to safely navigate back to your swim by boat during darkness. The roller features a built-in night light that offers a subtle glow when activated. We have also included metal screw-in snag ears.

Alarms and receiver both require a 9V battery (not included).

Range: 100m

Available in 3+1 (multi-color or "all blue") and 4+1.

Multiple alert and audio configurations can be selected:

- Alarm LED and audio
- Alarm LED only (silent)
- Alarm audio only (no LED)
- Alarm no audio or LED (alert on receiver only)

Features:

- Dial knob adjustable volume, tone and sensitivity
- Mute function (sound and light)
- Different sound and light for dropback bites
- Lighthouse LED (red) on rear
- Night light
- Low battery consumption
- Removable snag ears

U4X BITE ALARM SET

Sets of a receiver and alarms with adjustable volume, tone and sensitivity. To set the volume and sensitivity there are two, easy to reach king-sized dial knobs. On the left side of the housing there are two push buttons: one to set the tone (T) and one (L) to switch on/off the lighthouse LED on the back. After having rowed out the bait, that blinking LED enables you to easily find your way back to your swim. The 3-way switch at the bottom is easy to reach, easy to operate and, most of all, easy to read: to the left is "on", in the middle is "off" and to the right is "mute". Drop back indication by light and sound (white LED and a double tone). The reach of the transmitter is at least 100 meters. The receiver has sound, light and vibration bite indication. Alarms and receiver are rain proof. All in all, alarm sets that are easy to understand, easy to operate but still have all the modern features you need to fish as effectively and comfortably as possible. The alarms work on two 1.5V batteries (AAA) and the receiver too (not included).

- Adjustable volume, tone and sensitivity
- Drop back indication by light and sound
- 3-way switch (on/off/mute)
- Blinking lighthouse LED
- Range over 100 meters
- Rain proof alarms and receiver
- Receiver with sound, light and vibration bite indication
- Low battery consumption

COMPACT STAINLESS STEEL ROD POD

A remarkably versatile and compact, stainless steel, twin back bone rod pod for two or three rods. The buzzerbars can be screwed off and then used as goal post buzzerbars. The many outer twist locks reduce the risk that the line gets caught behind them. The screws that are there are all designed and constructed in such a way that they can't fall off accidentally. In other words: you can't lose them! Supplied in a practical, canvas holdall.

Dimensions:

Smallest possible size: 37x40x68cm

Biggest possible size: 50x55x110cm

TECHNICAL DETAILS

- Length: 68-110cm
- Height: 37-50cm
- Length front buzzerbar: 36cm

WEIGH SLING FLOATER

We managed to improve our most popular weigh sling. Four integrated, ultra-buoyant floats keep the weigh sling supported while in the water and a full-length zipper ensures that the carp cannot escape. Both the carry straps and the aluminum poles have practical eyes for weighing the fish. 1.2m in length, this weigh sling is capable of accommodating even the largest of carp. 100% Polyester.

- Full length zipper
- Four practical eyes
- Four integrated, ultra-buoyant floats
- Thanks to the mesh front and rear easily releases water
- 1.2m long
- Soft-touch finishing on the inside, to protect the fish
- Weight: 1.2kg

ELASTIC ROD PROTECTOR

The DAM Elastic Rod Protector is the solution to the long time existing problem of losing rod straps. It protects the tip and butt section of the rod and it is mounted on the rod within a few seconds. The advantage is that it is impossible to lose one rod strap because of the elastic band, which is connecting the two protectors. To avoid the elastic tape to tangle with other gear, a small Velcro strap is added to fix the elastic to the rod.

CARP CARRYALL ASSORTMENT

The DAM Carp Carryall Assortment is an extremely interesting bundle offer. The assortment includes 15 single bags in 3 different sizes that can be used for a lot of different purposes. By using a modern green fabric these carryalls will be bought by many fishermen, be it carp anglers or allround anglers. By having 4 outer pockets and one main compartment these bags offer a lot of space to store a lot of equipment properly. The amazing price allows you to offer these bags for a very good price in the shop and screams for high quantities.

DAM

LUGGAGE

The DAM Luggage can be truly described a success story, ongoing for many years. To continue this success story the time was right to modernize the DAM Luggage range in all aspects. Starting with the range itself and the available models, followed by the quality and features of the whole range and rounded off by a new, modern and appealing design.

New Materials:

On all DAM Luggage models, the main compartment as well as the bottom sides of the outer pockets are made of a new waterproof material (dark grey) to protect the equipment inside as good as possible. The smooth surface makes it super easy to clean.

The outer pockets also use two new fabrics, one olive green rip-stop fabric to keep some green accents in combination with a high quality 600D fabric used on the outer pockets and lids of the bags.

TACKLE BAGS

Featuring a fresh and modern design these tackle bags offer several useful compartments as well as a number of integrated hard PVC boxes for any kind of lures and terminal tackle. While the small and medium one has mainly been developed for the active spin angler walking along his fishing water, the large bag is mainly thought for the boat angler who carries a lot more of equipment!

BACK PACK

The very versatile DAM Back Pack is comfortable to carry and is full of features. 4 horizontal packed lure boxes make space for a variety of lures. The main compartment offers rooms for food, camera and all other kind of equipment. The front pocket is ideal to store things like your mobile. On one of the side pockets, you will find a box for small tackle like swivels or hooks, the other pockets keeps your keys and other little things. The thick padded shoulder straps avoid a sour back after a long day fishing while you have your hands free.

MULTI-COMPARTMENT ROD BAGS

Very versatile and functional rod bags with 2, 3 or 4 individual rod compartments. On both sides, outer pockets offer enough space for a rod pod or landing net. Additional open outer pockets are ideal for bank sticks and the special fixing straps can hold an umbrella. The clever carrying system includes a standard handle and a very convenient "back pack" system to have free hands at all times.

CAMOVISION BELLY BOAT INCL. AIRPUMP

The DAM CamoVision Belly Boat does not only look extremely cool, it also offers a lot of safety and space for the angler. The boat has 2 separate air chambers as well as the seat and back-rest which have a high buoyancy as well. Even if a hook would get stuck in one of the chambers, the other air chamber and the seat will have enough buoyancy to support the angler to get back to the bank safely. The CamoVision Belly Boat is equipped with 2 side pockets which are attached to the boat on a not disturbing and easy to reach position what gives the angler plenty of space for fishing. Outer fabric made from high quality 600D CamoVision polyester, inner tubes made from 100% PVC.

- Strong 600D CamoVision material (100% polyester)
- 2 inflatable air chambers (100% PVC)
- 2 side pockets, attached
- Comfortable seat and back-rest
- 2 thick padded shoulder straps for longer transport
- Carry handle at the bow

TORAY
HI-END GRAPHITES
Made in Japan

sea·guide®
PRECISION ROD COMPONENTS

Z1

The phrase "Zero Compromises" perfectly describes the attitude towards every single rod that has been developed for the Z1 series. All models feature cutting-edge rod-building technology using xxx-fast TC46 carbon blanks. The most important aspects of a spinning rod in general are action, balance, sensitivity and response. Z1 rods are equipped with high quality components like SeaGuide K-guides, SeaGuide reel seats and a high grade EVA handle, shaped in a way that influences the balance and weight of the rod in a positive way. With the EFFZETT Z1 made highest performance affordable!

TECHNICAL DETAILS

- XXX-fast, High modulus 46TC carbon blanks
- SeaGuide K-guides
- SeaGuide reel seat
- Specially shaped high grade EVA handle
- Fully machined fore grip with carbon applications

Z1 ULTRA LIGHT

After the great response on the normal Z1 rods we fulfilled the demand for ultra-light rods within the EFFZETT® Z1 series. The Z1 Ultra Light rods are available in 3 casting weights and 2 lengths and come with a carbon solid-tip. With these models the Z1 Ultra Light series offers the right rods for a lot of UL techniques, from fishing finesse rigs for perch or light spoon and spinner fishing for trout up to dropshot fishing and jigging with small soft lures. The amazing action of the slim and feather light TC 46 carbon blanks is detecting even the most sensitive bites but offers also enough power to land bigger fish without a problem.

TECHNICAL DETAILS

- X-fast, high modulus 46TC carbon blanks
- Carbon solid-tip
- SeaGuide K-guides
- SeaGuide reel seat
- Specially shaped high-grade EVA handle
- Fully machined fore grip with carbon applications

RODS

EFFZETT®

OPTIMUS II

The EFFZETT Optimus II rods are a synonym for rod building perfected down to the smallest details. By using the latest blank building technology, we have succeeded in further improving the already outstanding TC40 carbon blanks of the 1st generation in terms of action (xx-fast), sensitivity, weight and diameter. All EFFZETT Optimus II rods are equipped with Fuji reel seats and SeaGuide K-guides, which have a higher-grade stainless steel frame than the guides used on the first generation, what is making them even stronger at less weight. The premium quality cork handle combined with highly durable black EVA gives these high performance rods a modern and timeless appearance.

TECHNICAL DETAILS

- Ultra slim TC40 carbon blank
- XX-fast action
- Strong and lightweight SeaGuide K-guides
- Fuji reel seat
- Premium cork quality handles
- Cross-Carbon-Optic
- Laser engraved butt cap

OPTIMUS II SPIN

These rods are the most versatile rods within the Optimus series. Due to the highgrade TC40 carbon we've developed an extremely sensitive, slim and highly durable durable series of rods. The outstanding extra fast tip action gives the angler ultimate control over the lure and transmits every vibration, no matter how carefully the fish grabs the lure. The strong backbone secures a perfect hook setting even at great distance. There's something for everyone in this superb range of spin rods, regardless of your chosen predatory species.

OPTIMUS II VERTICAL

To be the perfect rod for vertical jigging a rod has to fulfil some key requirements. We created that perfect rod– the EFFZETT Optimus II Vertical. The xx-fast and super sensitive 1-piece blank transmits everything that is happening underwater directly to the angler. Even though the 1.80m long rod is super sensitive, it has enough backbone to set the hook properly and to stay always in control of the fish. The EFFZETT Optimus II Vertical is available as spinning and casting version.

OPTIMUS II BIG SPIN

The EFFZETT Optimus II Big Spin is the perfect rod for fishing from the boat. Due to the 1-piece blank with handle connection, this rod is extremely powerful and ready to fight with the biggest predators. This 2.2m powerhouse is the perfect tool for big lures and big predators, that makes it difficult to stick to the famous "just one more cast".

OPTIMUS II LURE SHOOTER

The EFFZETT Optimus II Lure Shooter models are made for fishing with really-big lures for pike. The xx-fast 1-piece blanks (handle connected) allow long and precise casting, perfect control of the lure and deliver an immediate and exact signal if you have a take. The strong backbone of the EFFZETT Optimus II Lure Shooter rods also guarantees that the hookset gets through properly. In combination with our Quick Optimus 301 baitcast reel it is the perfect setup to hunt the biggest predators of the lake.

INTENZE SPIN

The EFFZETT® Intenze rods are combining modern technology, innovative materials and sophisticated design with the knowledge of our predator experts to fulfil their purpose of maximizing the success of every angler. Every single rod is tested and fine-tuned to make sure that the "feeling" is perfect. The x-fast, high modulus TC 36 carbon blank is equipped with quality SeaGuide K-guides and delivers an incredible casting distance, accuracy and response at a very thin blank diameter and low weight. The incredible sensitivity of the blank transports every vibration directly through the blank into the open and ergonomic reel seat. The reel seat and the carbon-cone rear grip are rubberized to increase the handling of the rod and to make it more comfortable to fish in cold conditions. These rods are not just a pleasure to fish with, also the extremely appealing and exclusive design attracts attention immediately.

EFFZETT®

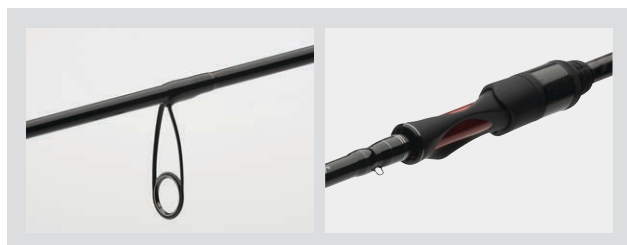

INTENZE DROPSHOT

The Intenze Dropshot rods offer everything a rod needs to be good dropshot rod. With the sensitive tip the angler is always in control of the lure and it is easy to send the small but strike triggering signals. The middle section of the rod has enough power for a proper hook-set and it is no problem at all to deal with big pikes or zanders. The Intenze Dropshot rods are available in 2,1m, 2,4m and 2,7m with a casting weight of 7-28g and come with a bright red tip for better visibility.

PERCH SPECIAL

A stylish rod series of two lengths (190cm and 230cm) each in three different casting weights: 1-6 gr, 2-8g and 3-12g, specifically designed for targeting perch. Also ideal for spinning for trout. Because we used high grade carbon blanks with a solid carbon tip and many micro-guides, we managed to make these rods slim, fast and lightweight (101 to 127g). Also from a design point of view, they look stunning!

SPINNERS

We are proud to be able to say that the working characteristics of all our spinners have been developed to absolute perfection. The shapes of the blades and the technology behind have been proven over the years with millions of sales around the world. The balance between the body and the spinner blade results in a streamlined, dynamic unit that is ideal for extra long and precise casts. Our range is continuously being supplemented by successful new designs based on ideas received from angling fans and our teams of angling professionals on location. Use EFFZETT® spinners with absolute confidence!

When the spinner is retrieved through the water, it sends out constant pressure waves that can be recognized by predatory fish from long distances, encouraging them to attack. Compare the working characteristic and these models will convince you.

RATTLIN' SPINNER

The EFFZETT Rattlin' Spinners are equipped with the unique and innovative 2nd generation of the Rattlin' Body Concept. Due to the wings on the second generation, the body is constantly turning underwater and keeps the steel balls inside moving and rattlin'.

The EFFZETT Rattlin' Spinners come with 2 unique features that create a nice side effect. Because of the special shape of the blade, the rattlin' body and the spinner blade are always turning into the opposite direction. These two opposite rotations also minimize the rotation of the spinner wire to practically zero, with the nice side effect that the fishing line is not twisted.

TECHNICAL DETAILS

- Unique Rattlin' Body Concept
- 3 x Attractive (Visual, Pressure and Sound)
- Feather treble for extra attraction
- 0,9mm stainless steel spring wire

NATURE 3D SPINNER

The Nature 3D series allows the angler to target specific predatory species. They present an extremely realistic imitation of all common types of bait fish, with the complex 3D decoration on the blades making these spinners appear much more life-like underwater.

TANDEM SPINNER

Our popular EFFZETT® Tandem Spinner features a clever connection design, meaning you actually have three spinners in one! Fishing them as a complete tandem is one of the most effective methods for pike, but you also have the option of removing the lower big spinner to use the smaller one as a perch or trout lure. Or simply use the large spinner on its own for zander.

SILVER/RED

PREDATOR SPINNER

This long spinner blade runs with only a slight pull and spins tightly around the bait, making it especially effective in shallow water.

UV-SPINNER

That the EFFZETT® UV-Spinners have only 4 basic colors gives them a kind of hand-made and classic look, but there is one small but important detail that makes these spinners irresistible for every predator. These spinners come with an UV-active feather treble that is very visible for the fish and at the same time the treble is the strike point for the fish, what increases the hookup ration a lot.

FAST WATER SPINNER

The EFFZETT® Fast Water Spinners are specially designed for fishing in fast running water. The heavy body in combination with the slightly longer blade gives these spinners an extremely stable action in heavy current and allows the angler to fish deeper than with a normal spinner.

KICK-S SPINNER

Fantastic little lead fish with a small spinner blade that looks realistic and is extremely effective for catching many kinds of predators! Because of its relatively high weight it can be fished slow and deep, perfect for fish like zander and perch. It can also be fished very fast and shallow which makes it killer bait for fish like asp and trout! Available in two weights and six crazy colours, possibly the most versatile lure available today.

ROACH & PERCH SPOONS

For pike and co. hard times break up in the predatory fishing area, because EFFZETT® brings the new and innovative metal lures EFFZETT® Roach Spoon and Perch Spoon into the game and onto the market! The unique design is based on the real body shape of a roach or perch. The unmistakable flanking action perfectly imitates a dying or sick fish in the water. The look of these nicely designed zinc metal lures will drive predators totally crazy: using state-of-the-art photo-printing technology, these lures come in a very natural look with incredible colors and details. Both lures are available in lengths of 7cm, 9cm and 11cm, what fits perfectly into the prey spectrum of all predatory fish. Another plus is the shape in connection with the weight. Since the EFFZETT® Roach & Perch Spoons are delivered in weights between 17g and 62g, they have a very good casting ability. Which makes them perfect for shore anglers who can't use a boat: Next to the natural Roach and Perch color, the EFFZETT® Roach and Perch Spoons are also available in bright and visible colors such as Fire Roach, Pink Roach, Rudd or Fire Perch, Orange Perch and Blood Perch, providing the right color for every situation.

TECHNICAL DETAILS

- Body profile and details inspired by nature
- Extremely realistic photo printed colors
- Lively, attractive and erratic action
- Ultra-sharp EFFZETT® treble
- 100% lead free lure, made of zinc

EFFZETT®

RATTLIN' SPOON

The EFFZETT® Rattlin' Spoon is an extremely innovative Spoon that has the 2nd generation of our EFFZETT® Rattlin' Body integrated. The action is exactly as it is on our normal EFFZETT® Standard Spoon but the steel balls in the rotating body are attracting a lot of extra attention. This Spoon is something that even the cleverest predators haven't seen before.

TWIN SPOON

With four-fold catching attraction this ingenious development has produced sensational results across the world.
In test angling the results were more than convincing.

THE SECRET OF SUCH SUCCESS IS BASED ON THE INGENIOUS FOURFOLD ATTRACTION:

1. The additional vibrations in the water caused by the jet-like effect of the double blades
2. The acoustic attraction from the continuous contact between the two fluttering spinner blades
3. The original EFFZETT® Spoon blade, well proven with over one-million sales!
4. The extremely effective surface decoration of the original EFFZETT®

PEACEMAKER BLADE

This special EFFZETT® metal lure has an extremely narrow vibe when retrieved. The special shape makes it resemble a small bait fish. At the back are three small holes. The further back you attach the lure to your line, the less aggressive it will vibrate. And the other way around, of course. Following the latest Japanese trends we applied a holographic film, to make it flash and attract even more fish. Ideal for vertical jigging for perch and zander. Also works great when you're spinning for asp!

EFFZETT®

STANDARD SPOON SLIM

When distance counts and the water is fast flowing, the EFFZETT® Slim Spoon is the perfect choice. Its aerodynamic shape makes it ideal for long-range casting. With gentle, meandering movements it entices sea Trout and salmon just as effectively as it attracts zander and pike.

PRO TROUT INLINE SPOONS

The EFFZETT Pro Trout Inline Spoons are not only ideal for trout fishing, but also a real weapon for perch fishing. The internal line guide brings various advantages such as, a much lower chance that the fish can shake off the hook with the help of the lure weight, an insanely large casting distance and various retrieve options for presenting the lure in different patterns. The extremely seductive swimming action attracts the attention of even the most sophisticated trout.

- Lead free! Made of zinc
- Anodized colors with extreme flash
- Fluttering sinking phase
- Including UV-active light pearl
- Single hook with a large eyelet

SPIN JIG

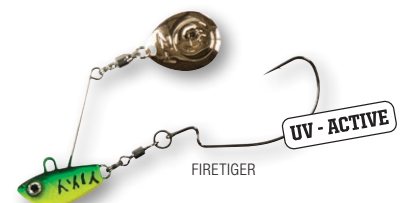

The EFFZETT Spin Jig is a really unique thing. At the back of the lead body comes out a short piece of spring wire that holds a small spinner blade. At the tail of the lead body is a wide gape hook attached with a swivel and a split ring. This wide gape hook holds any kind of slim softlure to have a weedless presentation. It can also be replaced by any other kind of hook. Deadly combination of blade rotation on drop and pull and softlure movement! (no softlures included)

NATURAL PERCH PADDLE TAIL

The EFFZETT Natural Perch Paddle Tail is the follow up on the very well received Natural Perch. The intense action of the paddle tail adds a nice rolling action to the body of the perch. The photo printed colors are looking so extremely realistic that you might have to take a closer look to tell the difference between a natural perch and the EFFZETT Natural Perch. The natural colors and the extremely realistic body profile will make it impossible to resist, even for the cleverest predators.

TECHNICAL DETAILS

- Extremely realistic photo printed colors
- Body profile inspired by nature
- Medium sink rate
- Aggressive tail action
- Rolling body action
- Ultra-sharp EFFZETT treble

NATURAL WHITEFISH

The EFFZETT Natural Whitefish idea comes from the simple fact that wherever pikes and whitefish live in the same water, whitefish are the preferred prey for the big pikes. This constellation of pike mainly feeding on Whitefish was reason enough to make a soft lure that looks profile and color wise like a real Whitefish. The EFFZETT Natural Whitefish is a typical swimbait with a relatively aggressive s-curve swimming action. That is for a reason, the actual hunting scenario! There are schools of whitefish over deep open water and the pikes just follow them through the open water. Since pike attach normally from out of the darker deep water we have to make sure that the lure sticks out as the different or wounded one among a couple of hundreds of Whitefish.

TECHNICAL DETAILS

- Extremely realistic photo printed colors
- Body profile inspired by nature
- Attracting S-curve swimming action
- Hard ABS inner harness with soft outer body (mesh reinforced)
- Medium sink rate
- Ultra-sharp EFFZETT treble

KICK-S MINNOW

The Kick-S Minnow is very well known among anglers for its deadly attraction and for often saving the day when angling is tough. Thanks to the long body shape and the willow-shaped spinner blade, the lure has an unrivalled swimming action that is simply irresistible to many predators. The colors have been carefully selected and tested by our international EFFZETT® predator team, using their wealth of experience and results. Made of phthalate-free material.

TECHNICAL DETAILS

- Realistic body shape and features
- Long range casting ability
- Narrow vibe action and blade rotation
- Ultra-sharp EFFZETT treble
- Made of phthalate-free material

SHADSTER

The high body shape of the EFFZETT® Shadster already attracts a lot of attention under water as a visual target, but in combination with the strong rolling and belly-flashing swimming action, even at the very slowest speed, it is simply irresistible! This excellently crafted and thoroughly designed lure immediately triggers the hunting instinct of big predatory fish and leads to extremely hard bites.

Like all models in the EFFZETT Shadster family the Shadster has an outstanding swimming action and superb hand painted colors and finishing. The 5 available

sizes of 7cm, 9cm, 12cm, 15cm and 20cm are suitable for many different rigging styles. From a round or stand-up jig head, a screw-in jig head for vertical jigging to a shallow screw on the 15cm and especially 20cm model, it can handle everything!

The Shadster has all it takes to end-up between the sharp teeth of the really big predators.

Available in a bulk box.

SHADSTER SLIM

The slim and elongated body shape EFFZETT® Shadster Slim is perfectly imitating the natural silhouette of many prey fish species like roach, bleak or minnow. The low and slim body shape and the wide tail create a strong rolling, belly-flashing swimming action, which immediately triggers the hunting instinct of predatory fish and leads to extremely hard bites. Like all models in the EFFZETT® Shadster family the Shadster Slim has an outstanding swimming action and superb painting and finishing. The 4 available sizes of 6,5cm, 8,5cm, 11,5cm and 13,5cm can be used extremely effective with many different rigging methods, be it vertical jigging or the simple and traditional way with a jig head and stinger.

One thing is for sure, it is the perfect snack for all predator fish!

Available in a bulk box.

SHADSTER POWER TAIL

The EFFZETT® Shadster Power Tail is a very versatile and effective shad with a great swimming action. The specially designed Power Tail with its 5 notches allows a lot of movement of the tail that creates the intense and lively action. Another advantage of the Power Tail is the exceptionally high hook-up rate, because the tail folds away super easy when the fish inhales the lure. Among the 3 available sizes of 6cm, 8cm and 11cm there is most likely the right size and color for nearly all predatory species such as trout, perch, pike or zander.

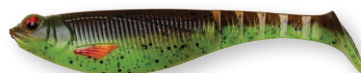

Available in a bulk box.

SOFT LURES

EFFZETT®

RTF SOFT LURES BULK

The EFFZETT RTF (Ready to Fish) Soft Lures are equipped with an EFFZETT Jig Head that is perfectly matching to the soft lure in weight and hook size. The angler can take it out of the box as it is and start fishing without having to do anything. In the EFFZETT RTF Soft Lure range, we offer 5 shapes: FZ Shad, FZ Grub, FZ Greedy Shad, FZ Longhorn and the FZ Kick-S Minnow Weedless Paddle Tail, each model in 3 sizes and with 4 colors per size. All models and sizes are delivered in "1" standardized box size with inner trays. This one box size makes it easier to present the lures in an organized and thought way that makes it easy for the angler to overview the assortment. Ready to Fish! – Ready to Catch!

EFFZETT®

BIG PIKE LANDINGNET

After the great success with the big size of the EFFZETT Big Pike Landing Net we also had a fast growing demand for 2 smaller versions with the same durable aluminum handle and frame.

The added small and medium sizes of the EFFZETT Big Pike Landing Net are still big enough to easily deal with the biggest freshwater predators.

ITEM NO.	SIZE	DIMENSIONS	MESH DIAMETER	MATERIAL	TRANSPORT LENGTH	PRICE

EFFZETT®

BIG FISH NET

The EFFZETT Foldable Big Fish Net is perfectly suitable for both ways, fishing from a boat and from the bank. It doesn't take up a lot of space in the boat, is easy to carry and ready to use within seconds. At the spreader block is a small switch that allows to fold the net head into half size as well. The handle opens and locks in the spreader block in any wanted position just by turning it.

Big enough for all size fish and due to the rubber coated mesh perfectly suitable for lure fishing.

BOAT NET

These EFFZETT® landing nets combine all features that anglers need when fishing from the boat, like a two-piece, telescopic handle for maximum freedom of movement in a confined space. When you don't need it right away (such as when the fishing is slow), you can fold the net double and slide the handle up to save space. We've rubberized the net to eliminate problems with treble hooks tangling in the material while the fish is still thrashing. Thanks to this, the angler no longer needs to worry about having to cut up his net to free the hook, giving the net a much greater lifespan.

PRO-TACT DOCUMENT BAG

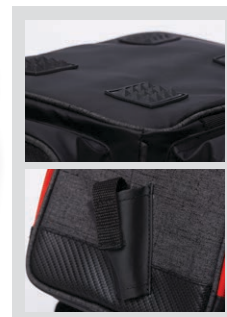

The EFFZETT Pro-Tact document bag puts other document bags in the shade. It has been perfected down to the smallest detail to provide maximum order and accessibility for all licenses and important fishing documents. In particular, the 2 transparent PVC document holders with zips, which can be opened outwards and provide a high level of clarity, make this document bag one of the most sophisticated of its kind. Made of 100% waterproof outer material (100% polyester), equipped with a high-quality zipper and EFFZETT rubber zipper puller. There are two transparent PVC windows behind the PVC document holders, which offer enough space to hold further documents. Simply a must have for every angler.

PRO-TACT SPINNING BAG

The EFFZETT Pro-Tact Spinning Bag is one size smaller than the Pro-Tact Lure Carryall. That doesn't mean it's a small bag, the 4 "M" lure cases in gunsmoke color can properly organized and next to that the outer pockets of the Pro-Tact Spinning Bag offer plenty of space for accessories, tools, licenses and even a drink. This medium sized bag is the perfect choice for active angling and long walks where a bigger bag around the shoulders would simply be annoying. During the development the focus was clearly on maximizing usability, meaning only adding features that create practical advantages. There is one feature that turned out to be so practical that it makes a big difference and that is the Quick-Access-Pocket in the lid. This 2,5cm high pocket follows the shape of the lid and offers an incredible amount of space for all things that are needed fast and frequently. Brilliant!

Like most models in the EFFZETT Pro-Tact Luggage series the Spinning Bag comes including a carbon steel plier with split-ring, cutting and crimping function.

TECHNICAL DETAILS

- Includes 4 "M" Lure Cases (27,5x18,5x5cm) in gunsmoke color
- Includes a carbon steel plier with split-ring, cutting and crimping function
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface
- Outer pockets made of very durable dark grey 600D rip-stop material
- High-quality zippers in red color with EFFZETT rubber zipper pullers
- Thick padded shoulder strap (detachable)
- Carry handles

PRO-TACT LURE CARRYALL

The EFFZETT Pro-Tact Lure Carryall offers an incredible amount of space to keep a lot of equipment organized and easily accessible. The 4 included "L" lure cases offer enough space to keep a lot of lures properly organized. This large carryall is the perfect model, if it is no option to leave the house without a huge variety of lures. Next to that the outer pockets of the Pro-Tact Lure Carryall offer plenty of space for accessories, tools, licenses, a measure tape and even a drink.

During the development the focus was clearly on maximizing usability, meaning only adding features that create practical advantages. There is one feature that turned out to be so practical that it makes a big difference and that is the Quick-Access-Pocket in the lid. This 2,5cm high pocket follows the shape of the lid and offers an incredible amount of space for all things that are needed fast and frequently. Brilliant!

Like most models in the EFFZETT Pro-Tact luggage series the Lure Carryall comes including a carbon steel plier with split-ring, cutting and crimping function.

TECHNICAL DETAILS

- Includes 4 "L" lure cases (36x22,5x5cm) in gunsmoke color
- Includes a carbon steel plier with split-ring, cutting and crimping function
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface

PRO-TACT SLING BAG

The EFFZETT Pro-Tact Sling Bag comes including 2 "M" lure cases, that offer enough space to bring a nice selection of lures while keeping them properly organized. The 2 clear PVC pockets with zipper in the main compartments hold small items like snaps or crimp sleeves, but also flat spools of fluorocarbon or steel wire. The wide and thick padded shoulder strap is also equipped with two pockets, that can hold a smartphone, a small camera, keys or some more fishing gear. There is also a bottle holder integrated where most bottles up to 0,7L fit in. The cool thing with the sling bag is that it is not disturbing at all, even though it has space and features to hold a lot of things.

Like most models in the EFFZETT Pro-Tact luggage series the Sling Bag comes including a carbon steel plier with split-ring, cutting and crimping function.

TECHNICAL DETAILS

- Includes 2 "M" lure cases (27,5X18,5 x5cm) in gunsmoke color
- Includes a carbon steel plier with split-ring, cutting and crimping function
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface

PRO-TACT BACKPACK

The EFFZETT Pro-Tact Backpack offers not only exceptional comfort due to wide and thick padded shoulder straps, but also several very useful features and details. In the easy accessible front compartment 4 "M" lure cases fit in, offering enough space for a wide selection of lures, while the space of the main compartment above them can be used for other useful utensils like a camera, a towel, a measure tape or even a snack or drink.

The lid of the main compartment is equipped with a large clear PVC pocket that closes with a zipper and which is perfectly suitable for storing small items like snaps or crimp sleeves, flat spools of fluorocarbon or steel wire or the fishing license.

On each side of the backpack there are 2 small pockets, that offer additional space. On the left side of the backpack at the very bottom is a small pocket with zipper that tidily stores the rod sock, which makes it easy to bring a second rod or a small foldable landing net that can be fixed with a Velcro strap further up on this side.

The Pro-Tact Backpack is simply the best choice for fishing all day, without having pain in the back and at the same time having both hands free all the time!

Like most models in the EFFZETT Pro-Tact luggage series the Backpack comes including a carbon steel plier with split-ring, cutting and crimping function attached on the bottom right outer pocket.

TECHNICAL DETAILS

- Includes 4 "M" lure cases (27.5X18.5x5cm) in gunsmoke color
- Includes a carbon steel plier with split-ring, cutting and crimping function
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface

PRO-TACT BOAT BAG

The EFFZETT Pro-Tact Boat Bag originated from the idea of developing a completely thought-through solution for boat anglers. The basic plan was to develop one bag that can hold pretty much everything that is needed for a day on the water. That means it has to offer enough space for a wide selection of lures, but also other important things like pliers and accessories. The result is the Pro-Tact Boat Bag, that comes with 3 "XL" and 2 "L" lure cases, which offer enough space for a wide variety of lures. Inside the main compartment, there is a narrow separate compartment, that perfectly holds long unhooking pliers, but also all other types of pliers securely. The 3 big outside pockets offer enough space for all kinds of accessories and small parts. The raised edge of the moulded EVA lid makes it the perfect place to safely keep an open lure box, loose lures, the remote control of the trolling engine or a cell phone.

The bag that really has it all!

TECHNICAL DETAILS

- Includes 3 "XL" (36X22.5X8cm) and 2 "L" lure cases (36X22.5X5CM) in gunsmoke color
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface
- Outer pockets made of very durable dark grey 600D rip-stop material
- High-quality zippers in red color with EFFZETT rubber zipper pullers
- Moulded EVA lid that is a perfect table
- Comfortable carry handles

PRO-TACT STREETFISHING BAG

The EFFZETT Pro-Tact Streetfishing Bag comes including 2 "M" lure cases and is equipped with one big pocket in the front and one medium size side pocket, in which a lot of terminal tackle and accessories fit in. There is also a bottle holder on the other side that easily holds bottles up to 0,7 L. On the outside of the front pocket, there is another hidden pocket which is ideal for fishing papers, phones or keys. The comfortable and thick padded shoulder strap is freely adjustable to make it fit perfectly.

Like most models in the EFFZETT Pro-Tact Luggage series the Streetfishing Bag comes including a carbon steel plier with split-ring, cutting and crimping function.

TECHNICAL DETAILS

- Includes 2 "M" lure cases (27.5X18.5X4.5cm) in gunsmoke color
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface

PRO-TACT SPINNING VEST

The EFFZETT Pro-Tact Spinning Vest is equipped with many small zipped pockets on the front side that offer almost endless storage possibilities. Each of the 2 front pockets holds a "S" lure case, offering plenty of space for lures. On the inside there is one big mesh pocket on each side. The backpack has a 3-layer construction to allow the angler to keep everything organized and easily accessible. Fully adjustable shoulder- and side straps to fit most people and most waist sizes.

Like most models in the EFFZETT Pro-Tact Luggage series the Spinning Vest comes including a carbon steel plier with split-ring, cutting and crimping function.

TECHNICAL DETAILS

- Includes 2 "S" Lure Cases (17.5X14.5X4.5cm) in gunsmoke color
- Includes a carbon steel plier with split-ring, cutting and crimping function
- 100% waterproof outer material (100% Polyester) in black color, with an extremely smooth, easy to clean and scratch resistant surface

WATERPROOF LURE CASE

Nowadays lures are getting more advanced year by year, so lure storage should also continuously improve. The EFFZETT® Waterproof Lure Cases are a big step towards perfect lure storage. Equipped with a sealing ring and 4 locks these lure boxes will keep all kinds of lures dry no matter what conditions the fisherman is facing. The gunsmoke plastic material is hard- and softlure friendly and due to the color it also protects the lures inside from UV radiation. The range offers 4 different sizes that fit almost every type and size of lure.

- Small: 23x18x5cm

EFFZETT®

TROLLING SYSTEM

Fantastic and easy to assemble system for trolling shads of all sizes. Just fix the little flexible splint in the center of the shad head and the fixed, shorter one on the right place in the body of the shad. Use the stinger spike to fix the treble hook on the right place of the belly of the shad and your shad gets an irresistible action while trolling it.

BALL JIGHEAD

All around the world people use jigheads to rig their softlures and with the hope of catching the fish of their dreams. But to catch these fish the fisherman has to be able to rely on his setup and since the hook is the connection to the fish, the EFFZETT Ball Jigheads are equipped with a high quality hook. These hooks are extremely sharp, strong and durable which gave them the first class reputation for so many years. The EFFZETT Ball Jighead comes logo branded and with an

indication of hooksize and weight molded in the lead head. The ball jigheads have a small lead lure holder that is just big enough to hold the lure in place properly without destroying slim softlures right away. The range consists of 30 different models with hooksizes from 1/0 to 8/0 and leadweights from 5g to 30g. Despite of having a high quality hook, the EFFZETT Ball Jighead is offered for an extremely interesting and competitive price that is hard to beat at this quality level.

GUN-STYLE DEEP THROAT HOOKOUT STAINLESS

The EFFZETT® Gun-Style Deep Throat Hookout is a must have for serious pike fishermen. Since pike often attack lures very aggressively, the hooks can sit deep in the toothy mouth. To avoid serious damage on fingers and hands, this plier comes in a length of 24cm. With the ergonomic pistol handle design, an easy one-hand operation is guaranteed. The non slip jaws allow maximum grip on the hook and since this plier is made from teflon coated stainless steel it will not start to rust. Probably the most suitable plier for fish with big teeth.

CLEARVIEW & PRO SUNGLASSES

EFFZETT Sunglasses are designed by fishermen for fishermen. At EFFZETT® we think that this approach helps develop products that are perfectly suited for the job in hand. The two new models „Clearview“ and „Pro“ cover all types of face shapes for a perfectly comfortable fit. This reduces the light intrusion to a minimum and maximizes the quality of the vision. Both, „Clearview“ and „Pro“ glasses are available in 2 different lens colors. „Blue Mirror“ for very bright weather and „Amber“ for more cloudy days.

White Series

RODS

MADCAT

WHITE X-TAAZ ROD SERIES

For those catfish anglers who only want to fish with the best of the best MADCAT® introduced a limited range of rods called: the White X-TAAZ Series. Attractive and functional design: the tapered, carbon cones make it remarkably easy to clean the rods from catfish slime. Made with high quality components, including Japanese Toray blanks. Every MADCAT® White X-TAAZ rod excels in every thinkable way: design, strength, balance, weight, reliability, durability, sensitivity and power. Cast further, feel more takes, apply more power and... catch more and bigger catfish.

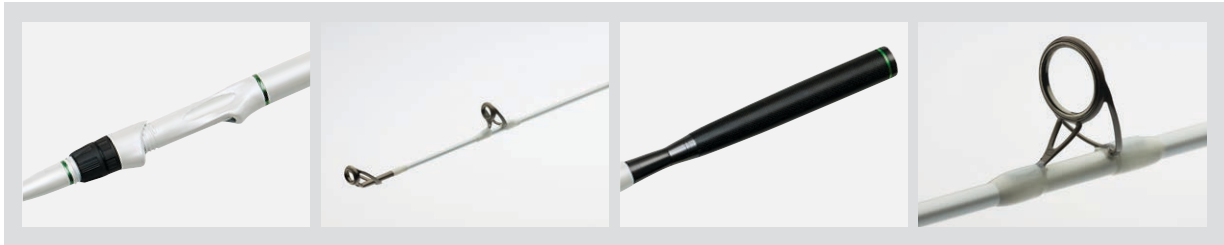

WHITE X-TAAZ FAR OUT

Ideal rods for fishing at a distance with buoys. Very powerful yet sensitive meaning: rigid enough to keep a long braid out of the water but shock absorbent enough to wear even the heaviest and hardest fishing catfish down. Made of 30 ton, Toray carbon, an original Fuji® DPS-H reel seat and SeaGuide® guides.

Extendable butt

WHITE X-TAAZ VERTICAL EXT.

Specially designed for vertical jigging. The White X-TAAZ Vertical Ext. 170 might well be the most remarkable MADCAT® rod the guys behind MADCAT® have developed until now. The key feature here is the extendable butt! A short counter clock-wise twist allows the angler to extend the butt. To fixate it again, at the desired length, a simple clock-wise twist will do. The advantage is enormous: during the vertical jigging the short the butt end allows maximum freedom of movement. During the fight the extended butt, literally, provides more leverage. Made with a 30 ton, Toray carbon blank, a Fuji® reel seat and SeaGuide® guides.

Made in Japan

WHITE X-TAAZ SPIN

Powerful yet lightweight and sensitive rods are needed to enjoy casting heavy catfish lures, to feel a take and, also, to set the hook and control the catfish. The challenge was to combine and balance all these different and sometimes even conflicting properties and characteristics. But... we managed to do exactly that. What great rods the WHITE X-TAAZ rods turned out to be. They say "seeing is believing" but in this case it's more appropriate to say "feeling is believing". Made with a 30 ton, Toray carbon blank, a Fuji reel seat and SeaGuide® guides.

Carbon

WHITE INLINE MULTIPLIER LFC

MADCAT® inline rod with a trigger reel seat (PSSM, original Fuji®) that is specially designed for vertical jigging and heavy fish. Made with a 30TC nano carbon blank with inside a low friction coil (LFC), which is better for the line. Less friction inside the blank also means that the power from the fish is transmitted to the reel better, improving the drag function.

Carbon

WHITE DELUXE G2

The second generation of the white MADCAT® Deluxe rods. Specially designed for fishing with break lines at medium distance. Also ideal for fishing at the bottom of big, fast flowing rivers, like the Po or the Rhine. Long, semi-parabolic and practically unbreakable because of the nano carbon. But we didn't only improve the look of these rods, we also changed the guides to a more subtle but extremely heavy duty SeaGuides®.

TECHNICAL DETAILS

- 24TC nano carbon blank
- Semi-parabolic
- High quality EVA grips (hardness 70)
- Fighter grip
- 7 Original SeaGuide® XR guides

BLACK CLOSE COMBAT 180

The newest member of the legendary MADCAT Close Combat sequence. This upgrade of the Black Series Close Combat 180 offers an ergo dynamic shaped SeaGuide® XSS reel seat, for more sensitivity. The whole rod is lighter in weight and now the black EVA handle part is covered with shrink tube. That gives it an extra smooth feel, makes it non-slip and easy to clean. This Close Combat is ideal for vertical jigging from out of a boat or even belly boat: super sensitive, perfectly balanced and a joy to look at. Powerful enough to set the hook with sufficient force and play monster catfish hard. And when you do... the oversized, EVA Comfort butt cap helps ease the wonderful pain of catfishing!

TECHNICAL DETAILS

- SeaGuide® XSS reel seat
- 24T carbon blank
- Shrink tube covered handle part
- Oversized EVA Comfort butt cap

PRECISION ROD COMPONENTS

BLACK SPIN

Especially in case of spinning rods the right weight, balanced, sensitivity and power are of vital importance, because spinning for catfish requires constant casting and retrieving. It's simply hard work! We believe we managed to find the right combination of all these requirements. The light, ergo dynamic shaped SeaGuide® XSS reel seat and shrink tube covered handle part give the MADCAT Black Series Spin rods an extra comfortable feel.

TECHNICAL DETAILS

- SeaGuide® XSS reel seat
- 24T carbon blank

 PRECISION ROD COMPONENTS
**BLACK HEAVY DUTY**

This series is called "Heavy Duty" because these rods are meant to withstand some level of abuse. For instance: the SeaGuide® AG guides used are without a damage-sensitive ceramic inlay. Under the motto: what's not there, you can't break or lose! The black EVA handle part is covered with shrink tube, to make it non-slip and easy to clean. Ideal rods for distance fishing with buoys or subfloats in one of Europe's fast running catfish rich rivers.

NEWAVAILABLE
JANUARY 1ST 2021**BLACK PELLET**

Pellet fishing is hot since people have discovered that it doesn't only work in the Spanish Ebro but also in French and German rivers. So, the fishing evolved the last few years and we had to rethink and reinvent our pellet rod. The result: a rod completely different from the old carp style pellet rod: it's shorter, more heavy duty and has a more sensitive tip. The black EVA handle part is covered with shrink tube, to make it non-slip and easy to clean.

TECHNICAL DETAILS

- 24T carbon blank
- Shrink tube covered handle part

JANUARY 1ST 2021**BLACK CAT-STICK**

When we developed and tested the CAT-STICK we always had one thing in mind: we have to make a catfish rod that can stand the extreme power of monster catfish and also, rough handling by the catfish angler. So with this in mind, we developed a rod with double wrapped guides without a shock ring, a glass blank, rubber grips and a heavy duty aluminum reel seat. Rods built to last, recommended for buoy fishing or float fishing with heavy bait fish.

TECHNICAL DETAILS

- Aluminum reel seat, #22
- Double wrapped SeaGuide® AG guides

Trade Unit 1

**BLACK DELUXE**

Series of rods specially designed for distance fishing with buoys or subfloats. Also suitable for pellet fishing. For every different distance, technique or angler there is a suitable length. Executed with a heavy duty reel seat (for big reels with big spool capacities), heavy duty guides and a handy fighter grip. The black EVA handle part is covered with shrink tube for an extra smooth feel (very easy to clean). Deluxe rods are very popular model among catfish anglers who like to fish in medium to big rivers at great distance, because the strength and length gives the angler, literally, more leverage.

TECHNICAL DETAILS

- DPS-H style reel seat, #22
- 24T carbon blank
- Shrink tube covered handle part

INLINE RATTLER

Possibly the very first ever hard lure specifically developed for European catfish. The extremely narrow vibe make the balls inside scream murder! This lure is so loud that catfish simply can't resist the urge to attack it. It is the ultimate catfish lure. Where other lures fail, this one catches. Tested over and over again, in several waters – it simply out fishes and out catches anything else on the market. There is a 90 gram version for spinning and a 20 gram heavier version for vertical jigging. The 110 gram model also runs deeper when spinning or trolling. Doesn't matter if you cast or troll it, basically you can't fish it wrong. As soon as the angler starts reeling it in, that very second, he can expect a mind-blowing strike. And after that: he's in business! The 6X strong treble is exactly the right size, shape and strength and is sharper than anyone would expect from a treble of this proportion. And last but not least: every MADCAT Rattler is inline. In other words: the body can slide up the trace when pressure is applied, so the catfish can never use the body to throw the hook.

TECHNICAL DETAILS

- Sinking
- Rattling
- Extremely narrow vibe
- Inline
- 6X strong and ultra-sharp 3/0 treble
- 220lb swivel
- 13cm long
- 90 and 110g heavy

A-STATIC SILENT TEASER

After the huge success of the MADCAT® Clonk Teasers, it was time for a new version: the A-STATIC Silent Teaser. In heavily pressured waters, the catfish is still attracted by the clonk teaser, but when it approaches the lure, it may get suspicious, because of the ticking beads. What is then needed, to trigger an attack, is the turbulence of an escaping bait fish – without sound! The MADCAT® A-STATIC Silent Teasers are developed to produce as much as possible turbulence, caused by the skirt with a wavy edge and golf ball dimples, on both the body and the skirt. Grooves at the bottom of the skirt, makes that the skirt folds away easily when the teaser is lowered (but spreads firmly when lifted). In other words: it will create as little as possible turbulence when lowered but as much as possible when lifted. The MADCAT® A-STATIC Silent Teasers are so sophisticated that it will fool even the weariest catfish again. A-STATIC, meaning: rubber coated, to minimize the electric field that spooks catfish. Note: the coating can wear off during usage.

A-STATIC SCREAMING SPINNER

The next generation MADCAT® spinners, in attractive colors. An A-STATIC Screaming Spinner has so much more to offer than other, ordinary spinners: the blade always immediately starts to spin, the rotating body has metal balls inside that scream non-stop and it is A-STATIC: to minimize the electric field that spook catfish. Plus: it comes with a super strong and ultra-sharp, 6X strong quality treble, size 3/0. Note: the rubber coating can wear off during usage.

Trade Unit 5

A-STATIC INLINE SPOON

Heavy, inline catfish spoons suitable for casting long distances. The advantage of the inline construction is that a catfish cannot use the blade as a lever in an attempt to get rid of the lure, because then the spoon will simply slide away from the treble, up the leader. Treble size: 3/0. A-STATIC, meaning: rubber coated, to minimize the electric field that spooks catfish. Note: the rubber coating can wear off during usage.

LINES

MADCAT

SMART BITE-ALARM SET

Reliable, motion-detection, wireless catfish alarm set with a reach of at least 100m. Ideal for buoy fishing or, for instance, the increasingly popular bottom fishing with subfloats in fast running rivers.

Remarkably easy to use. With a big, easy to reach, on/off button. As soon as the alarm is turned on, it will automatically determine the angle it is under, after which you can adjust the sensitivity by pressing the S-buttons. S- means "sensitivity down" and S+ means "sensitivity up", from hyper-sensitive to very insensitive, in 5 steps. Same for the volume buttons: V- stands for "volume down" and V+ means "volume up", from very quiet to very loud, also in 5 steps. So simple! No need to study and remember a complicated user manual. And, after having set the hook, the alarm can be switched off by a simple press on the on/off button.

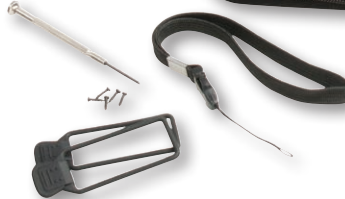

Performs under the harshest conditions, like wind, frost and heat. Because of a sealed circuit board, the alarms will not be affected by fog or rain. A white LED on the top of the alarm will light up the rod for 10 seconds every time the alarm goes off. A rubber strap makes that these alarms will fit on practically every rod and... keeps it in position, even when striking.

The receiver responds 1:1 the same as the alarm, without any delay. On the receiver the sound can be muted by one press on the mute button. Another button activates (or turns off) the vibration function. Of course, the volume is also adjustable (in 5 steps).

The alarms and the receiver operate with two normal AAA 1.5V batteries. Extremely low battery consumption.

CE-approved, so meeting all the legal requirements of EU law.

The sets come in a protective case and two spare rubber straps, a screwdriver and five spare screws are included.

DEADBAIT CLIPS

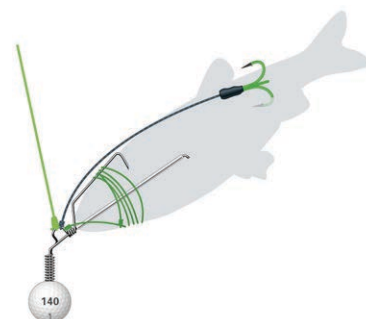

Simple but very effective dead bait clips, made out of 1.2mm stainless steel spring wire. For making a dead bait rig: place one on each end of a small subfloat and keep them in place with a MADCAT® Super Stopper. Job done!

ITEM NO.	PCS	PRICE
56665	6PCS	-

Trade Unit 5

NEW
AVAILABLE
JANUARY 1ST 2021

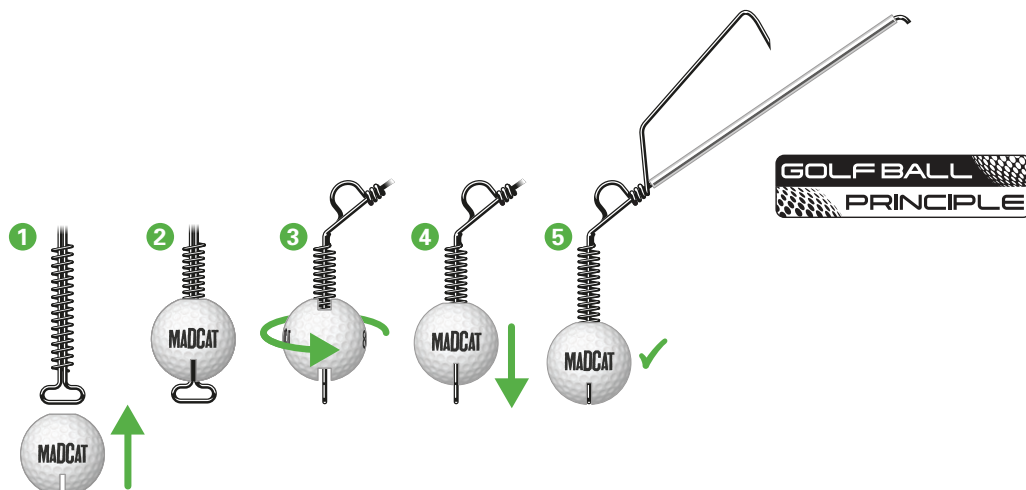

GOLF BALL JIG SYSTEM ANTI SNAG

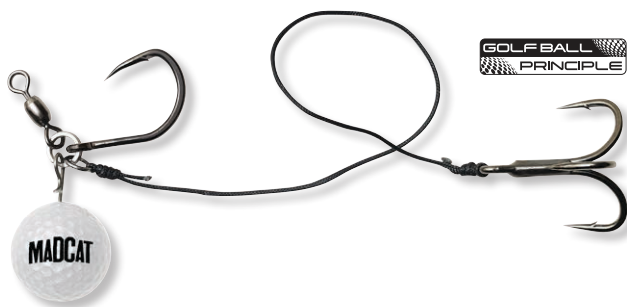

Jig system kits for dead baits with interchangeable Golf Ball lead heads. With golf dimples (to reduce drag). The big advantage is that the lead head can be changed very easily. What weight should be applied depends on the size of the bait fish, the depth of the water or the current. Another big advantage is the angle at which the bait fish will be when the lead is placed on the bottom: at a feeding angle. That results in more takes. Plus it greatly reduces the risk of getting snagged to the bottom. Two kits available: one with an 80 and 120 gram and one with a 140 and 180 gram lead head.

ITEM NO.	WEIGHT	PRICE
66104	80+120G	-
66105	140+180G	-

Trade Unit 5

**GOLF BALL
PRINCIPLE**

GOLF BALL SNAP-ON VERTIBALL RIG

Vertical jig system with a clip-on lead ball with golf ball dimples (to reduce drag). All parts (swivel, split ring, solid ring, braid, single hook and treble) are heavy duty. Ready to use. Which rig and/or weight you should choose depends on the current, depth of the water and/or the size of the baitfish. Loose balls, in various weights, are available.

Trade Unit 6

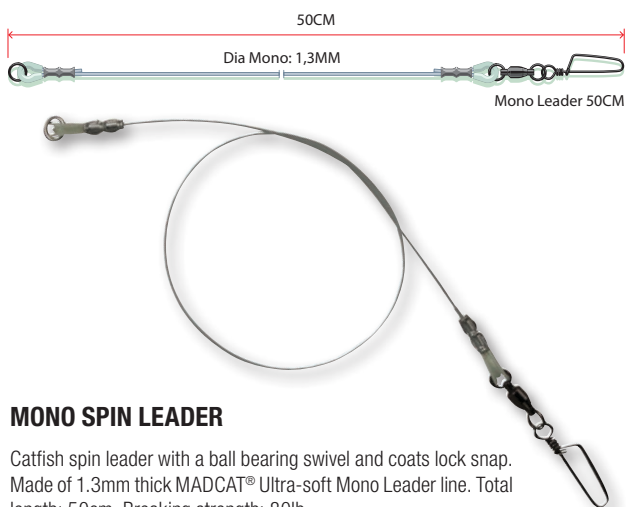

GOLF BALL SCREW-IN JIGHEAD

Jighead with golf dimples (to reduce drag). Simply screw a soft lure on the jighead and attach a stinger treble. The eye of the jighead is, on purpose, made a bit oversized, to make it easy to attach the mainline and the stringer. The big advantage of this particular type of jighead, over conventional jigheads with a single hook: a catfish can't use the hook shank as a crowbar anymore. You will simply lose less fish. Once you start using screw-in jigheads you will wonder how you ever managed without them!

SCREAMING SUBFLOATS

These hollow, ABS subfloats may very well be the most advanced and best performing subfloats on the market today. As long as the float spins it rattles. And since it spins non-stop, it rattles non-stop! Available in three sizes: small, medium and large (20, 40 and 60 gram).

CLONK DLX (W/O GIFT BOX)

Our famous Clonk Deluxe, only now without the luxury gift box – to make it more affordable. Handmade of one piece of wood, so no glued parts that can fall or break off. With a unique head shape that makes it very easy to produce the right sound.

ITEM NO.	PRICE
56539	-
Trade Unit 10	

CLONK DEEP WATER

Clonk with a big, flat head, ideal for producing really loud sounds. The powerful shockwave it produces is able to reach and provoke catfish even in the deepest parts of the river. Completely hand carved out of one piece wood, so no attached parts that can fall or break away. With this clonk it is easy to produce the right sound; ideal for beginners.

ITEM NO.	PRICE
8421003	-
Trade Unit 5	

KLONG

The black MADCAT® Klong is a high quality clonk that produces a quick and powerful sound! The ergonomically designed handle part and the simple handling, make it perfectly suitable for every kind of catfish angler.

ITEM NO.	PRICE
8421002	-
Trade Unit 1	

CLONK CLASSIC

Classic shaped clonk, carved out of one piece of hard wood. No glued or screwed parts, so it won't fall apart. With a medium sized, convex shaped head. The advantage of a convex head is that it doesn't splash as much as, for instance, a flat head. So, the user won't end up with a wet arm. The downside: it may be a bit difficult to produce the right sound for beginners. The best clonk for the experienced catfish cracks.

ITEM NO.	PRICE
8421004	-
Trade Unit 5	

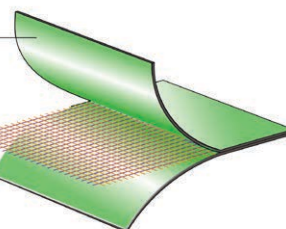

BELLY BOAT

Catfishing from out of a belly boat gets more and more popular and therefore MADCAT® has come up with a special catfish belly boat: the tubeless MADCAT® Bellyboat 170cm. When developing this belly boat the people behind MADCAT® paid extra attention to strength, safety and stability. Therefore the MADCAT® Belly boat is made of 0,70 and 0,90 millimeter thick PVC. It also has a wide, protective strap on the sides. The highly visible MADCAT® green colour ensures that the angler will be noticed on the water by other boat traffic. For maximum control over the boat and fish, the belly boat is longer than most bellyboats on the market at 1,7 meters. What also makes this bellyboat extra suitable for catfishing is the high, inflatable seat, allowing the angler to easily reach the water with his clonk. This is the ultimate, heavy-duty catfish belly boat. Comes with a repair kit and foot pump.

■ Outside PVC layer offers:
Abrasion resistance;
Extreme condition resistance;
Chemical resistance.

■ Inside high polyester fabric offers:
Dimensional stability;
Tensile and tear strength.

Points of making

- Adhesive structure
- Polyurethane glue
- Cold welding
- Made by hand
- Four layers reinforced seams.

Trade Unit 1

FPR BELLY BOAT

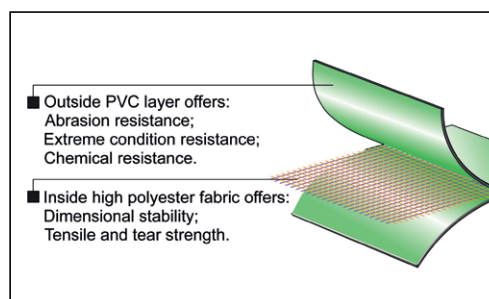

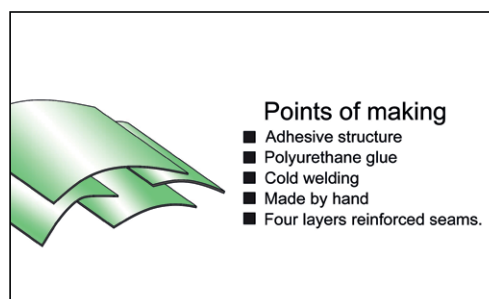

After the success of our first MADCAT® Belly Boat we decided that it was time to take the belly boat to the next level. For that we teamed up with a Dutch company that developed a special trolling engine for belly boats: Float Plus. The MADCAT® Float Plus Ready Belly Boat is completely designed and prepared for a Float Plus trolling engine. It has an inflatable bottom (with a special hole for the power cable and a special Float Plus engine mount), which makes the boat float higher, so that it is extremely easy to steer and doesn't drain the battery so much. The MADCAT® FPR belly boat is also 10cm longer than the normal 170cm long MADCAT® Belly Boat, for more buoyancy and stability. It also leaves more space for accessories, like a fish finder, a camera, a small table, a rod rest and so on. By using the highest quality, 0.70mm thick PVC material available, we managed to keep the weight below 12.5kg. The carry straps have extra powerful clips. Smart carry straps on the inside. At both tube ends a thick protection strip, for extra protection against grinding over land.

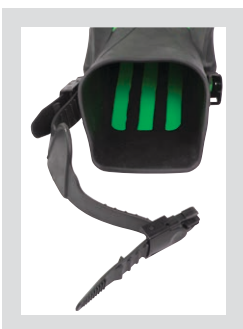

Float Plus PRO System: the Float Plus 25lb trolling engine comes with a floating, wireless, full color LCD remote and a powerful 12 Volt, 41,6Ah LG lithium-ion battery in a waterproof protection case with charger. It will drive the MADCAT® FPR Belly Boat maximum 5 km/h and will last 6 to 20 hours (depending on driving speed). Float Plus PRO System not included - needs to be purchased separately (www.floatplus.com).

- Float Plus Ready (fully prepared for a Float Plus PRO System)
- Inflatable bottom with cable hole and engine mount
- Elastic battery case mounting cables with hooks
- Inflatable seat on top of the inflatable bottom (to sit high and dry)
- 1.8m long, for added stability and improved driving properties
- Just 12.5kg (heavy duty carry straps included)
- Two handy carry straps on the inside
- Extra protection strip at both ends
- Foot pump and repair kit included
- Motor not included
